

# CROSS RIM WRENCH

The EGA Master cross wrench provides a four-arm structure to apply force from different angles, facilitating the process of loosening or tightening nuts.

**1.** Manufactured from special steel for increased torque, strength, and durability.

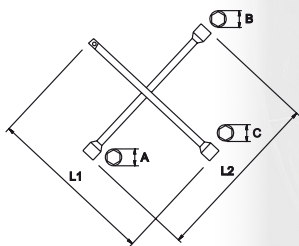

**2.** Its cross-shaped design provides a structure that allows for balanced force application from different angles.

**3.** It allows for use with both hands for increased force and control.

**4.** Ideal for repetitive tasks that require a constant wrench size, increasing efficiency and speed on the job.

**5.** Included socket sizes: 17, 19, and 22 mm.

**Easy to use!**
