

# HAND RIVETER

The EGA Master hand riveter, with its ergonomic and functional design, allows the user to easily place rivets into pre-drilled holes, ensuring a firm and permanent connection between pieces.

It is an essential tool in construction and manufacturing, providing a robust joint **without the need for welding or screws**.

**1.** Suitable for aluminum and steel rivets.

**2.** Extra storage for rivet heads: 2.4, 3.2 and 4.0 marked on the riveter body.
