

OFFSET PIPE WRENCH 90°

The EGA Master non-sparking offset pipe wrench 90° wrench is designed to work in industrial environments with risk of explosion or flammable atmospheres, such as refineries or chemical plants.

1. It is made of non-ferrous alloys (aluminum bronze or beryllium copper) that prevent the generation of sparks, is corrosion-resistant, non-magnetic and certified under ATEX standards.

2. With a hardness of 311-408 Brinell (Cu-Be) and 241-311 Brinell (Al-Bron).

3. Its ergonomic “duckbill” design allows access to tight areas and to hold parts with precision, ensuring safety and durability in critical applications.

COD.	MAT.	COD.	MAT.	L (inch)	CAP. (mm)	Kg
36305	Cu-Be	36310	Al-Bron	8	34	0,5
36306		36311		10	48	0,8
36307		36312		12	50	1,1
36308		36313		15	60	1,9
36309		36314		18	76	2,6

Cu-Be Beryllium copper
Al-Bron Aluminium bronze
