## Elegida para la exposición "La Utilidad del Diseño" del **Círculo de Bellas Artes**

2008

## The Fine Arts Circle of Spain choses the Basque Wrench for its "Usefulness of Design" exhibition

2008

## Élue pour l'exposition « l'Utilité du Dessin » du **Cercle des Beaux Arts**

2008

**EGA Master fabrica la más amplia gama de llaves ajustables del mundo, de distintos tamaños, tipos e innovaciones exclusivas a nivel mundial: ajustables, combi, con acción rápida, con o sin mango Comfort, de moleta lateral, aisladas 1000 V, a izquierdas, de boca ancha, Titacrom® o fosfatadas.**

*EGA Master manufactures the widest range of adjustable wrenches in the world, with all kinds of sizes, types, and exclusive innovations: adjustable, combi, quick action, with or without Comfort handle, with lateral nut, 1000V safety insulated, left turn, wide opening, Titacrom® or phosphated.*

**EGA Master fabrique la plus grande gamme de clés à molette au monde, avec toutes sortes de dimensions et avec des innovations exclusives au niveau mondial: ajustables, combi, avec action rapide ou non, avec ou sans manche Comfort, à molette latérale, isolées 1000 v, tourne à gauche, de grande ouverture, Titacrom® ou bruni.**

1

Acción rápida para un rápido posicionamiento de la medida.

*Quick action system enables fast positioning.*

Action rapide pour un positionnement plus simple de la mesure souhaitée.

2

Sistema Combi permite trabajar con elementos poligonales, tubo o tuercas desgastadas.

*Combi system for working with polygonal elements, pipes or rounded-off nuts.*

Système Combi qui permet de travailler avec des éléments polygonaux, des tubes et des écrous détériorés.

3

Máxima apertura y mínimo espesor de bocas para una máxima operatividad.

*Maximum opening and minimum jaw thickness for best accessibility.*

Ouverture maximum et épaisseur minimum des mâchoires pour une action optimale.

4

TITACROM® - tratamiento superficial especial, resistente a la corrosión y a los golpes y roces, es anti-reflectante y de gran atractivo.

*TITACROM® - special surface treatment, rust-proof and anti-chipping off, it is non-reflecting and with very attractive finishing.*

TITACROM® - traitement spécial de surface, résistant à la corrosion et aux coups, anti-réfléchissant et de grand attrait avec un manche confortable et anti-dérapant.

5

Mango Comfort bi-componente antideslizante para máxima comodidad y de gran atractivo.

*Comfort bi-component anti-slippery handle for best comfortability and great attractive design.*

Manche Comfort bi matières anti-dérapant pour une meilleure commodité et une meilleure esthétique.

6

Diseño reforzado para trabajos pesados que multiplica su resistencia al apriete.

*Heavy Duty Performance to provide maximum resistance to high torque.*

Conception renforcée qui permet une résistance au serrage pour les travaux lourds.

7

Patente mundial.  
Worldwide patent.  
Brevet mondial.

## LLAVE COMBINADA REVERSIBLE MASTERGEAR REVERSIBLE MASTERGEAR COMBINATION WRENCH CLÉS MIXTES REVERSIBLES MASTERGEAR

El diseño exclusivo de las llaves **MASTERGEAR** provee al profesional más exigente de una llave multiuso para el apriete en los lugares de más difícil acceso y con un cómodo sistema de carraca. Fabricadas en cromo-vanadio, soportan ampliamente los valores de torsión de los estándares de calidad más exigentes. Su carraca de 72 dientes junto con el diseño especial de su cabeza posibilita aprietes en las posiciones más complicadas, necesitando únicamente 5° para ello. Reversibles, Stubby, E-Torx... todo lo necesario para el profesional.

*The exclusive design of the MASTERGEAR wrenches, provides the demanding professional with an all-in-one wrench for the most difficult access tightening, with a comfortable ratchet system. Made in chrome vanadium, they easily stand the most restrictive quality standards for torque. Their 72 teeth gear together with the ratchet head design enables tightening in the narrowest places, with only 5° required for such purpose. Reversible, Stubby, E-Torx... all that the demanding professional may need.*

La concepción exclusiva de la clé **MASTERGEAR** fournit au professionnel le plus exigeant une clé multi-usages pour le serrage dans des lieux exigus, avec un système de cliquet. Fabriquées en chrome vanadium, elles supportent amplement les valeurs de torsion que requièrent les standards de qualité les plus exigeants. Son cliquet de 72 dents, combiné à un dessin spécifique de la tête, permet des serrages dans les positions les plus complexes, requerrant uniquement 5° pour agir. Réversibles, Stubby, E-Torx... tout l'indispensable pour le professionnel.

Nuestro objetivo de fabricar herramientas más eficientes y fáciles de usar nos ha llevado a diseñar la palanca de cambio HALF-MOON para las llaves combinadas reversibles **MASTERGEAR**, que evita cambios indeseados y repentinos de dirección de giro durante el uso. Asimismo, está diseñada para evitar el reemplazo prematuro por rotura de palanca, al encontrarse ésta protegida y sin sobresalir del cuerpo de la llave.

*Our aim to make more easy-to-be-used and more efficient items, led us to design the newest HALF-MOON switch for the MASTERGEAR Reversible Combination Wrenches, which avoids unwanted or unconscious switch reversing as well as premature damage of the switch. Besides, this switch is designed to avoid the early need to replace it because of breakage, as this switch is protected by the body of the wrench.*

Notre objectif de fabriquer des outils plus performants et plus faciles d'usage, nous a amené à dessiner le bouton de changement de sens de la clé à cliquet réversible **MASTERGEAR**, en forme de demi-lune, ce qui a pour effet d'éviter des changements de sens indésirables et soudain durant l'utilisation. De même, sa conception permet d'éviter des remplacements prématurés de la clé pour cause de rupture du levier, le bouton étant protégé car ne ressortant pas trop du corps de l'outil.

Su innovador diseño de estrella permite apretar múltiples y diferentes cabezas de tornillo, tales como Spline, 6 lados, 12 lados, E-torx y Cuadrados, incluso en cabezas redondeadas hasta en un 50% por el desgaste.

*Its innovative box drive allows to tighten multiple nut heads such as Spline, 6-point, 12 point, Square and E-torx, as well as with 50% rounded off nuts.*

Son dessin innovateur en étoile, permet de serrer de multiples et différentes têtes de vissage, telles que Spline, 6 pans, 12 pans, E-Torx et carrées, y compris des têtes arrondies à 50% par usure.

EGATORAK

## EGATORIK

En muchos procesos de producción y mantenimiento es necesario realizar un control estadístico sobre los aprietes realizados. Este control se lleva comúnmente a cabo volviendo a apretar las tuercas hasta que las mismas presentan un desplazamiento y anotando el par al que las tuercas han comenzado a desplazarse. La lectura del par depende de la habilidad del usuario, ya que se debe simultanear la realización de un esfuerzo de apriete progresivo y cuidadoso; la sensación de movimiento y la lectura del par en ese preciso instante; dificultando todo ello un registro preciso del par original y, por tanto, estas mediciones pueden presentar desviaciones importantes sobre el par real que se pretende medir.

Para eliminar todos estos factores que añaden imprecisión a la lectura, EGA Master ha desarrollado sus llaves dinamométricas de control de par que registran el par de apriete original de la tuerca mediante un innovador sistema que registra el par en el mismo momento que la tuerca comienza a girar, gracias a su sensor de giro angular (registrando el valor de par cuando detecta un giro de 3°).

El par conseguido depende de la velocidad de apriete; cuando más lento se realice el apriete, más preciso será el resultado. El display mostrará un mensaje de error si se realiza demasiado rápido.

*In many maintenance and production processes it is necessary to conduct statistical control over previously tightened fasteners. This control is generally carried out by re-tightening the screws until they show a displacement (called the just move test) and recording the torque just at the point the fastener began to move. The accuracy of the recorded torque depends on the abilities of the user, since it is necessary to perform the tightening operation in a progressive and careful manner; the movement of the fastener and the torque reading occur at the same time; making the precise recording of the original torque even more difficult, so the actual values recorded in this manner can represent a considerable deviation in the real torque that was intended to be measured.*

*In order to overcome these factors which lead to reading inaccuracies, EGA Master has developed its torque checking wrenches. They register the original tightening torque of the fastener by means of an innovative system that registers the torque at the same time that the fastener starts to turn, thanks to its rotation angle sensor (registering the torque's value when it detects a turn of 3°).*

*The measured torque depends on the speed of the operation: the slower the operation, the more precise the result will be. The display might show an error message if the process is carried out too fast.*

Dans beaucoup de processus de production et de maintenance, il est nécessaire de réaliser un contrôle statistique sur les serrages réalisés. Ce contrôle se mène généralement à bien en serrant à nouveau les écrous jusqu'à ce que ces derniers montrent un léger déplacement, et en notant le couple à partir de laquelle les écrous ont commencé à se déplacer. La lecture du couple dépend de l'habileté de l'utilisateur, puisque il faut assurer à la fois la réalisation d'un serrage progressif et d'une grande attention; la sensation de mouvement et la lecture du couple à cet instant précis. La difficulté est augmentée par un registre précis du couple originale, ainsi que toutes ces mesures peuvent présenter des déviations importantes sur le couple réel que l'on prétend mesurer.

Pour éliminer tous les facteurs qui ajoutent de l'imprécision à la lecture, EGA Master a développé ses clés dynamométriques de contrôle de couple, qui enregistre le couple de serrage original de l'écrou, grâce à un système innovateur qui enregistre le couple au même moment que l'écrou se met à tourner, grâce à son capteur de rotation angulaire (qui enregistre la valeur du couple quand il détecte une rotation de 3°).

Le couple atteint dépend de la rapidité du serrage; plus le serrage se réalise lentement, plus le résultat sera précis. L'écran affichera un message d'erreur si ce serrage s'effectue trop rapidement.

1

Sistema de grabación y comunicación de datos (para los modelos con cable para la comunicación).

*Data recording and communication system (for models with communication cable).*

Système de mémoire et de communication (pour les modèles équipés d'un câble).

2

Sistema de aviso sonoro y luminoso para 9 valores prefijados.

*Audible and light warning system for the 9 pre-setting torques.*

Système de Bip sonore et lumineux pour 9 valeurs pré-sélectionnées

3

Encendido progresivo de leds luminosos al acercarse al valor prefijado.

*Progressive switching on of the light leds to approach the pre-set value.*

Luz progresiva por Leds en s'aproximant de la valeur sélectionnée.

4

Dos modos de medida: M1: para la verificación de pares de apriete y M2: para modos de operación Peak (valor máximo de torsión) & Track (valor de torsión actual).

*There are two measurement modes: M1: for the verification of tightening torque and M2: for Peak (maximum torque value) & Track (current torque value).*

Deux modes de mesure: M1 : pour la vérification de paire de serrage et M2 : pour les modes d'opération Peak (valeur maximale de torsion) & Track (valeur de torsion actuelle).

5

Almacenamiento de hasta 250 valores.

*It can store up to 250 values.*

Capacité de stockage jusqu'à 250 valeurs.

6

Equipadas con mangos ergonómicos y antideslizantes.

*Oversized ergonomic & anti-slippery handles.*

Equipées de manches ergonomiques et anti-dérapants.

7

Calibración vía web 24 h.

*24h web calibration system.*

Ajustement en 24 heures par le Web.

12M

### Ejemplo:

Para obtener un par de salida de 1800Nm, se debe introducir un par de entrada:  
 Par de entrada = par de salida x ratio neto factor de multiplicación  
 $1800 \times 1/4.5 = 400\text{Nm}$

### Example:

To obtain an output torque of 1800Nm, user should apply an input torque of:  
 Input torque = output torque x net ratio multiplication factor  
 $1800 \times 1/4.5 = 400\text{Nm}$

### Exemple:

Pour obtenir un moment de sortie de 1800Nm, il faut introduire un moment d'entrée:  
 Force d'entrée = force de sortie x ratio net facteur multiplicateur  
 $1800 \times 1/4.5 = 400\text{Nm}$

## CARACTERÍSTICAS / FEATURES / CARACTÉRISTIQUES

Cr-V

### DISPOSITIVO ANTIRRETORNO:

Los multiplicadores de par con una caja de engranajes de relación 22.5:1, disponen de un sistema antirretorno para eliminar la reacción originada en el apriete. Este dispositivo bloquea la tuerca, evitando que el multiplicador rebobine dado el alto ratio de multiplicación que soporta. Esto garantiza al usuario un uso cómodo, fácil y seguro. Todos los modelos disponen de una maleta para su protección y fácil transporte.

### NON-RETURN SYSTEM:

Torque multipliers with a 22.5:1 relation gearbox, include a non-return system to avoid the reaction induced in the grip. This system locks up the nut, not allowing the torque multiplier to rewind, due to the high ratio level supported. These guarantees the user a safe, easy and comfortable use. All models have a special case in order to be well protected and easy to transport.

### DISPOSITIF ANTI RETOUR:

Les multiplicateurs de couple ont une boîte d'engrenage de rapport 22.5:1, ils sont dotés d'un système anti-retour pour éliminer la réaction produite par le serrage. Ce dispositif bloque l'écrou, évitant que le multiplicateur rebobine à cause du haut ratio multiplicateur qu'il supporte. Ce qui confère à l'utilisateur une utilisation confortable, aisée et sûre. Tous les modèles sont présentés avec une malette pour leur protection et leur transport.

### CARACTERÍSTICAS / FEATURES / CARACTÉRISTIQUES

Los brazos de reacción para soldadura se proporcionan sin tratar térmicamente. Se requiere tratamiento térmico final (material Aisi 4140 / DIN17225 a 38-42 HRC / ISO 42CrMo4) / Weld disk are not heat treated as provided. Final heat treating is required (material Aisi 4140/DIN17225 to 38-42 HRC / ISO 42CrMo4) / Les bras de réaction pour le soudage sont fournis non traités thermiquement. Traitement thermique final requis (matériel Aisi 4140 / DIN17225 a 38-42 HRC / ISO 42CrMo4)

Las llaves hidráulicas dinamométricas de **EGA Master** han sido diseñadas para el apriete controlado de conexiones tuerca-perno. El movimiento de rotación del conjunto tuerca-perno se consigue a través del flujo hidráulico y presión suministrados por las bombas hidráulicas **EGA Master**, con mando remoto para controlar el avance y retroceso del flujo hidráulico.

La gama **EGA Master** de llaves hidráulicas dinamométricas de cuadrado conductor (para trabajar con llaves de vaso de impacto) o de cassettes hexagonales (no requieren de vaso adicional) permiten el apriete de una de las más amplias gamas de medidas tanto en milímetros como en pulgadas. Sus reducidas dimensiones, junto con su alta durabilidad, las hacen indispensables en una gran variedad de sectores: petroquímico, eólico, generación de energía, naval, etc.

*EGA Master's hydraulic torque wrenches have been designed for controlled tightening of nut-bolt connections. The remotely controlled hydraulic flow and pressure supplied by EGA Master hydraulic power units provide the rotation of the nut on the bolt.*

*The assortment of square drive and hexagonal cassettes hydraulic torque wrenches allows tightening of a very wide range of nut sizes, both in millimeters and inches. Their small dimensions and high durability make them the perfect tool for several sectors: petrochemical industry, wind sector, power generation, naval sector, etc. Square drive wrenches need additional impact socket wrenches while hexagonal cassette ones don't.*

Les clés hydrauliques dynamométriques d'**EGA Master** ont été conçues pour le serrage contrôlé de connexions écrou-boulon. Le mouvement de rotation de l'ensemble écrou-boulon s'obtient à travers le flux hydraulique et la pression fournie par les pompes hydrauliques **EGA Master**, commande à distance afin de contrôler l'avancée et de recul les flux hydrauliques.

La gamme **EGA Master** de clés hydrauliques dynamométriques à carré conducteur (pour travailler avec les douilles à choc) ou de cassettes hexagonales (qui n'ont pas besoin de clé additionnelle) permettent le serrage d'une des plus larges gammes de mesures autant en mm qu'en pouces. Ses dimensions réduites ainsi que sa haute durabilité, les font indispensables dans une grande variété de secteurs: pétrochimique, éolien, production d'énergie, navale, etc.

#### Características comunes

Su conector hidráulico de 360°x360° facilita el uso de la llave al permitir una movilidad total de la manguera.

#### Common features

The 360°x360° swivel allows a total mobility of the hose, making its use easy and comfortable.

#### Caractéristiques communes

Son connecteur hydraulique de 360°x360° facilite l'usage de la clé car elle permet une mobilité totale du tuyau.

## LLAVES HIDRÁULICAS DE CUADRADO SQUARE DRIVE TORQUE WRENCHES CLÈS HYDRAULIQUES À CARRÉ

Tabla de aprietes grabada en láser para un acceso más rápido.  
*Laser engraved torque chart for faster access.*

Table de serrages gravée à laser pour un accès plus rapide.

• Brazo de reacción giratorio 360° para una correcta fijación en cualquier aplicación.  
*360° swivel reaction arm for a correct fitting on any application.*

• Bras de réaction giratoire 360° pour une fixation correcte dans n'importe quelle application.

• Permite el uso de la herramienta sin brazo de reacción.  
*Allows the use of the tool without reaction arm.*  
Permet l'utilisation de l'outil sans bras de réaction.

• Permite un cambio rápido de sentido presionando únicamente el cuadrado conductor, sin necesidad de herramientas adicionales (códigos 56578, 56572, 56579, 56580).  
*Allows quick change of direction pushing the square drive, without additional tools (codes 56578, 56572, 56579, 56580).*

• Permet un changement rapide de sens en appuyant uniquement sur le carré conducteur, sans nécessité d'outils additionnels (codes 56578, 56572, 56579, 56580).

**LLAVES DINAMOMÉTRICAS HIDRÁULICAS DE CUADRADO CONDUCTOR / SQUARE DRIVE HYDRAULIC TORQUE WRENCHES / CLÉS DYNAMOMÉTRIQUES HYDRAULIQUES DE CARRÉ CONDUCTEUR / QUADRAT HYDRAULISCHE DREHMOMENTSCHLÜSSEL / CHIAVI DINAMOMETRICHE IDRAULICHE CON ATTACCO QUADRO / CHAVES DINAMOMÉTRICAS HIDRÁULICAS DE QUADRADO CONDUTOR / ГИДРАВЛИЧЕСКИЙ ДИНАМОМЕТРИЧЕСКИЙ КЛЮЧ С ПРИСОЕДИНИТЕЛЬНЫМ КВАДРАТОМ**

- 1 Chasis de un solo cuerpo / Mono-body housing / Châssis d'un seul corps**
- 2 Vástago de empuje oscilante / Balanced drive rod / Tige à poussée oscillante**  
Movimiento del pistón sin cargas / *Wide load-free piston movement* / Mouvement du piston sans charges
- 3 Cremallera multidentada / Multi-tooth drive segment / Crémaillère multi dentelée**  
Asegura una carrera de apriete de 27 grados / *Ensures up to 27 degree torque stroke* / Assure un parcours de serrage de 27 degrés
- 4 Carraca Anti-Retroceso / Anti-back lash mechanism / Cliquet Anti- Recul**  
Permite su operación sin manos / *Provides hands free operation* / Permet son opération sans mains
- 5 Tabla de torsiones grabada con láser / Laser engraved torque chart / Plancher de torsion gravée au laser**  
No más búsquedas de las tablas / *No more searching for charts* / Plus de recherches des planches
- 6 Rueda multidentada / Multi-tooth ratchet / Roue multi dentelée**  
Los fuertes dientes de Vascomax aportan fuerza, precisión y un ángulo de apriete de 27 grados / *Strong Vascomax teeth provide strength, accuracy and 27 degree torque stroke* / Les fortes dents de Vascomax apportent force, précision et angle de serrage de 27 degrés

- 7 Disco transmisión de una sola pieza / One piece drive plate / Disque transmission d'une seule pièce**  
El disco de transmisión de Vascomax de una pieza proporciona una mayor vida útil e incrementa la durabilidad / *One piece Vascomax drive plate provides longer life and increased durability* / Le disque transmission de Vascomax d'une pièce proportionne une vie utile supérieure et augmente la durabilité
- 8 Conductor a través de empuje / Push-through drive / Conducteur à travers la poussée**  
Empuje simple para cambiar de aflojar a apretar / *Simply push to switch from loosen to tighten* / Poussée simple pour changer de desserrer à serrer
- 9 Junta de pistón individual / Single seal piston / Joint de piston individuel**  
Aumenta el tiempo de trabajo sin mantenimientos / *Assures extended maintenance free operation* / Augmente le temps de travail sans maintenances
- 10 Acción directa sobre el chasis / Direct housing reaction / Action directe sur le châssis**  
Permite el uso de la herramienta sin el brazo de reacción / *Allows use of tool without reaction arm* / Permet l'utilisation de l'outil sans le bras de réaction
- 11 Extremo del brazo de reacción de acero / Steel reaction boot / Extrémité du bras de réaction en acier**  
La característica de campo sustituible protege el brazo de reacción / *Field replaceable feature protects reaction arm* / La caractéristique du champ remplaçable protège le bras de réaction

- 12 Brazo de reacción de larga longitud / Long length reaction arm / Bras de réaction de longue longueur**  
Permite su apoyo en todas las aplicaciones / *Allows for reaction on all applications* / Permet son appui dans toutes les applications
- 13 Botón de liberación del brazo de reacción / Reaction arm release button / Bouton de libération du bras de réaction**  
Protegido dentro de la carcasa del brazo de reacción / *Protected within reaction arm housing* / Protéger dans la carcasse du bras de réaction
- 14 Conector giratorio 360°x360° / 360°x360° swivel / Connecteur giratoire 360°x360°**  
Permite el despeje de las mangueras en todas las aplicaciones / *Allows hose to be cleared on all applications* / Permet le dégagement des tuyaux dans toutes les applications
- 15 Rápidas conexiones antigoteo / No drip quick connect couplers / Connections anti-goute rapides**  
Asegura un manejo fácil y seguro / *Assures easy and safe operation* / Assure un manieiment facile et sûr
- 16 Pistón de aleación de acero / Steel alloy piston / Piston d'alliage en acier**  
Una composición robusta permite un ciclo de trabajo mayor / *Robust composition allows for longer operation cycle* / Une composition robuste permet un cycle plus long de travail

## LLAVES HIDRÁULICAS DE CASSETTE HEXAGONAL HEXAGONAL CASSETTES TORQUE WRENCHES CLÉS HYDRAULIQUES À CASSETTE HEXAGONALE

**LLAVES DINAMOMÉTRICAS HIDRÁULICAS HEXAGONALES / HEXAGONAL HYDRAULIC TORQUE WRENCHES / CLÉS DYNAMOMÉTRIQUES HYDRAULIQUES HEXAGONALES / HEX HYDRAULISCHE DREHMOMENTSCHLÜSSEL / CHIAVI DINAMOMETRICHE IDRAULICHE ESAGONALI / CHAVES DINAMOMÉTRICAS HIDRÁULICAS HEXAGONAIS / ГИДРАВЛИЧЕСКИЙ ДИНАМОМЕТРИЧЕСКИЙ КЛЮЧ КАСЕТНОГО ТИПА ШЕСТИГРАННЫЙ**

**1 Cilindro con "forma de cacahuete" / "Peanut-shaped" cylinder / Cylindre en "forme de cacahuète"**

Fije tanto el cilindro como el cassette en zonas de difícil acceso / Fit both the cylinder and link in confined areas / Fixez le cylindre et la cassette dans les zones de difficile accès.

**2 Acoplamiento del pistón / Engagement rod / Couplage du piston**

En el primer movimiento embraga automáticamente / Automatically engages link on the first stroke / Dans le premier mouvement embraie automatiquement

**3 Trinquete anti-bloqueo / Never-lock drive paw / Cliquet anti blocage**

Asegura que no se bloquee nunca la herramienta / Ensures tool will never lock on / Assure que l'outil ne se bloque jamais

**4 Trinquete multi-dentado / Multi-tooth ratchet / Cliquet multi dentelé**

Permite una precisión de carrera de apriete de 27 grados / Allows for 27 degree torque stroke accuracy / Permet une précision de parcours de serrage de 27 degrés

**5 Disco de arrastre de una sola pieza / One piece drive plate / Disque de traînage d'une seule pièce**

Una combinación robusta que permite radios de curvatura pequeños / Robust alloy provides for small nose radius / Une combinaison robuste qui permet d'obtenir des petits rayons de courbure

**6 Pasador de enganche / Link pin / Goupille d'accrochage**

Pasador para engancharlo al engranaje del cilindro. No se necesitan herramientas / One pin for link to cylinder engagement, no tools required / Tige de crochet pour l'accrocher à l'engrenage du cylindre. Pas besoin d'outils

**7 Superficie de reacción en línea / In-line reaction pad / Surface de réaction en ligne**

Asegura todo el tiempo una reacción libre / Assures free reaction every time / Assure tout le temps une réaction libre

**8 Pasador de alineación de acero / Steel alignment pin / Tige d'alignement en acier**

Asegura una carga de desplazamiento igual entre las placas laterales / Assures equal load displacement between side plates / Assure une charge de déplacement pareil entre les plaques latérales

**9 Diseño completamente delgado / Completely flat design / Design complètement mince**

El ancho del cilindro y del cassette son iguales para espacios estrechos / Cylinder and link width are equal for tight fits / La largeur du cylindre et de la cassette son pareil pour des espaces étroits

**10 Conector 360°x360° / 360°x360° swivel / Connecteur 360°x360°**

Permite el despeje de las mangueras en todas las aplicaciones / Allows hose to be cleared on all applications / Permet le dégagement des tuyaux d'arrosage dans toutes les applications

**11 Sellado hermético de teflón / Proprietary piston seal / Scellé hermétiquement en téflon**

Evita tareas de mantenimiento durante años / Provides years of maintenance free use / Évite les tâches de maintenance pendant des années

**12 Pasador / Slider / Tige**

Evita el desgaste del pistón y del disco de transmisión y reduce los costes de reparación / Prevents wear of piston and drive plate and reduces cost of repairs / Évite l'usure du piston et du disque de transmission et réduit les coûts de réparation

**■ ALGUNAS SITUACIONES DONDE PUEDEN SER ÚTILES LAS LLAVES HIDRÁULICAS HEXAGONALES**  
**SOME SITUATIONS WHERE HEXAGONAL TORQUE WRENCHES CAN BE USEFUL**  
**QUELQUES SITUATIONS OÙ LES CLÉS HYDRAULIQUES HEXAGONALES PEUVENT ÊTRE UTILES**

**BOMBAS HIDRÁULICAS / HYDRAULIC POWER UNIT PUMP / POMPES HYDRAULIQUES / HYDRAULISCHE PUMPE / POMPE IDRAULICHE / BOMBAS HIDRÁULICAS / ГИДРАВЛИЧЕСКАЯ СТАНЦИЯ**

Las bombas hidráulicas de EGA Master han sido diseñadas de acuerdo a las necesidades del usuario final. Disponibles para el funcionamiento con una única herramienta o con hasta cuatro herramientas simultáneamente, estas bombas están fabricadas para trabajar en entornos adversos, y permiten el ajuste de la presión deseada para garantizar la salida de par correcta a su aplicación.

Además de las bombas de accionamiento eléctrico (115VAC o 230VAC), EGA Master ofrece bombas de accionamiento neumático para ambientes explosivos o en aplicaciones donde la electricidad esté inaccesible.

*EGA Master's hydraulic power unit pumps have been designed according to the needs of the end user. They enable simultaneous use of four wrenches. EGA Master power units are manufactured to work in adverse environments, allowing pressure adjustment to assure the correct torque output to each application.*

*In addition to the electric drive hydraulic pumps (115VAC or 230VAC), EGA Master provides air drive hydraulic pumps to use them in explosive environments or in applications where the electricity is not available.*

Les pompes hydrauliques d'EGA Master ont été conçues selon les nécessités de l'utilisateur final. Disponibles pour le fonctionnement avec un seul outil ou même quatre outils simultanément, ces pompes sont fabriquées pour travailler dans des environnements adverses, et permettent l'ajustement de la pression désirée pour garantir la sortie correcte de couple pendant son application.

En plus des pompes d'actionnement électrique (115VAC o 230VAC), EGA Master offre des pompes d'actionnement pneumatique pour des environnements explosifs ou dans des applications où l'électricité est inaccessible.

La bomba hidráulica ATEX EGA Master 76757 no solo aporta las mejores prestaciones en cuanto a presión y caudal para un trabajo rápido y ergonómico, sino que asegura el cumplimiento de las medidas de seguridad exigidas por la Directiva 2014/34/UE para ambientes explosivos.

*The EGA Master ATEX hydraulic power unit pump 76757, not only provides the best features in terms of pressure and flow for a quick an ergonomic work, but also ensures the fulfilment of the safety measures required by 2014/34/UE Directive for explosive environments.*

La pompe hydraulique ATEX EGA Master 76757 non seulement proportionne les meilleures performances en termes de pression et de débit pour un travail rapide et ergonomique, mais elle assure également l'accomplissement des mesures de sécurité requises par la directive 2014/34/UE pour les environnements explosifs.

Los rompetuercas de EGA Master han sido diseñados para extraer tuercas oxidadas o atoradas de manera rápida y eficaz.

Es una herramienta exclusiva con un cabezal diseñado para acceder fácilmente a la tuerca, equipada con una cuchilla de alta precisión y concebida para una vida prolongada, pudiendo ser rectificada o sustituida con rapidez.

EGA Master ofrece una gama de rompetuercas que permiten extraer tuercas hexagonales con distancia entre caras 10-41 mm.

*EGA Master's hydraulic nut splitters have been designed for removal rusted or stuck nuts quickly and effectively.*

*It is a unique tool with a head designed to access easily to the nut, equipped with a high-precision blade and designed for a long life; it can be rectified or replaced quickly.*

*EGA Master offers a range of hydraulic tools which can remove hexagonal nuts whose across flat distance is between 10 to 41 mm.*

Les casse-écrous EGA Master sont conçus pour extraire des écrous oxydés ou bouchés de manière rapide et efficace.

C'est un outil exclusif à tête conçue pour avoir accès rapide à l'écrou, équipé d'une lame de haute précision et conçu pour une durée de vie plus longue, avec la possibilité d'être changée ou substituée avec rapidité.

EGA Master offre une gamme de casse-écrous qui permet d'extraire des écrous hexagonaux dont la distance entre les faces est de 10-41 mm.

Las bombas hidráulicas manuales de EGA Master han sido diseñadas para trabajar a una presión máxima de trabajo de 700bar, fabricadas en acero para alargar su vida útil.

Las bombas hidráulicas manuales de EGA Master incorporan una válvula interna de alivio de presión para dar seguridad al operario y a la bomba en caso de sobrecargas por encima de 700 bar.

EGA Master's manual hydraulic pumps have been designed to work to maximum working pressure of 700bar, made of steel to extend its life.

Manual hydraulic pumps of EGA Master incorporate an internal safety valve to provide security of the operator and pump in case of over pressurisation above 700 bar.

Les pompes hydrauliques manuelles EGA Master sont conçues pour travailler à une pression maximale de 700bar, faites en acier pour prolonger sa vie utile.

Les pompes hydrauliques manuelles EGA Master incorporent une valve de surpression intérieure pour la sécurité de l'ouvrier et de la pompe en cas de surcharge supérieure à 700 bar.

Las llaves de impacto neumáticas EGA Master están diseñadas para ofrecer un alto par de salida con un esfuerzo mínimo para el usuario, en campos como pueden ser reparación de automóviles, equipo pesado de mantenimiento, montaje de productos principales de construcción y para el lugar donde se precise una gran capacidad de par.

*EGA Master pneumatic impact wrenches are designed to deliver high torque output with minimal exertion by the user, in fields such as automotive repair, heavy equipment maintenance, product assembly major construction, and for any place where a high torque output is needed.*

Les clés à choc pneumatiques EGA Master sont conçues pour offrir une grande paire de sortie avec l'effort le plus minime pour l'utilisateur, dans les domaines tels que la réparation automobiles, les équipements lourd d'entretien, le montage de produits principaux de construction, et pour tous ceux qui nécessitent une grande capacité de paire.

**1** Motor diseñado para prevenir pérdidas de aire.  
*Motor designed to prevent power losses.*  
Moteur conçu pour prévoir les pertes d'air.

**2** Rotor con muelle, el cual ofrece un alto potencial de salida.  
*Rotor with spring which offers high power output.*  
Rotor avec ressort qui offre un grand potentiel de sortie.

**3** Cuerpo ultra-ligero fabricado en composite.  
*Composite and lightweight housing.*  
Corps ultraléger fabriqué en composite.

**4** Válvula especial One-piece diseñada para facilitar su mantenimiento.  
*Special One-piece Valve designed for easy maintenance.*  
Soupape spéciale One-Piece conçue pour faciliter son entretien.

**5** Entrada de aire rotatoria 360°.  
*360° Swivel Air Inlet.*  
Entrée d'air rotatif 360°.

**6** Silencioso - bajo nivel sonoro.  
*Low-noise.*  
Silence - faible niveau sonore.

**7** Pulsador de alta sensibilidad para un suave funcionamiento.  
*High sensitive trigger for smooth operation.*

Bouton à haute sensibilité pour un fonctionnement doux.

**8** Mecanismo de golpe de doble martillo de alto rendimiento.  
*High performance twin hammer mechanism.*

Mécanisme de coup de double marteau d'haute rendement.

**9** Facilidad de cambio de dirección.  
*Easy change direction.*  
Facilité de changement de direction.

**10** Conocimiento de par de apriete exacto en cada posición.  
*Exact tightening torque in each position.*

Connaissance du couple de serrage exact à chaque position.

- Excelente potencia / *Excellent power* / Excellente puissance
- Alta duración / *High life* / Longue durée
- Especialmente diseñado para uso industrial en automoción  
*Specially designed for industrial use in automotive service*  
Spécialement conçu pour usage industriel pour l'automobile

El taladro atornillador a batería de EGA Master es ideal para todo tipo de operaciones de perforación y fijación.

La batería de Ion-litio asegura el máximo rendimiento, durabilidad y una larga vida de la misma.

*EGA Master cordless drill is ideal for a wide range of drilling and fastening applications.*

*Its Lithium Ion battery ensures maximum performance, durability and battery life.*

La perceuse visseuse à batterie de EGA Master est idéale pour tous types d'opérations de perforation ou de fixation.

La batterie en Ion-Lithium assure un rendement optimal, durabilité et la longue vie de celle-ci.

**1**  
Carcasa y engranajes planetarios íntegramente metálicos asegurando el máximo rendimiento.  
*Completely metallic planetary gears and housing, ensuring the maximum performance.*  
Carcasse et engrenages planétaires complètement métalliques assurent un rendement optimal.

**2**  
Mango ergonómico para un cómodo agarre.  
*Ergonomic handle provides comfortable gripping.*  
Manche ergonomique pour une prise confortable.

**3**  
Interruptor de velocidad variable para un máximo control.  
*Variable speed switch for maximum control.*  
Interrupteur de vitesse variable pour un contrôle maximal.
