ESD ANTI-ESTÁTICA  
АНТИСТАТИЧЕСКИЙ ИНСТРУМЕНТ ESD

La descarga electrostática (Electro Static Discharge, ESD en inglés) es un fenómeno electrostático que hace que circule una corriente eléctrica repentina y momentáneamente entre dos objetos de distinto potencial eléctrico.

Los productos ESD de EGA Master hacen que se derive la energía electrostática de una forma controlada y segura tanto para el usuario como para los componentes electrónicos, lo que los convierte en el aliado ideal de la electrónica.

Los mangos bimateriales están especialmente diseñados con forma ergonómica, de tacto suave y antideslizante, favoreciendo el buen trabajo de la herramienta.

#### Aviso de seguridad:

No hay que confundir la herramienta ESD con herramienta aislante, por lo que no se deben utilizar nuestros productos ESD en componentes sometidos a tensión eléctrica.

*The Electro Static Discharge, ESD, is an electrostatic phenomenon which makes a sudden and momentary electrical current flow between two different objects with different electrical potential.*

*EGA Master ESD products dispose of the electrostatic energy in a safe and controlled way for the user and electronic components. That makes them the perfect tools for electronic applications.*

*Bimaterial antislippery and ergonomic handles with a soft feel for the best performance.*

#### Safety advice:

*Do not confuse ESD tools with insulated ones. ESD tools should not be used with components subject to electrical voltage.*

La décharge électrostatique (Electro Static Discharge, ESD en anglais) est un phénomène électrostatique qui fait circuler un courant électrique soudain et momentané entre deux objets de potentiel électrique différent.

Les produits ESD EGA Master font que l'énergie électrostatique soit déviée d'une façon contrôlée et sûre, aussi bien pour l'utilisateur que pour les composants électroniques, ce qui les rend des bons amis de l'électronique.

Les manches Bi-matière sont spécialement conçus avec une forme ergonomique, de toucher doux et anti-dérapant, favorisant un bon usage de l'outil.

#### Avis de sécurité:

Il ne faut pas confondre un outil ESD avec un outil isolé, car il ne faut pas utiliser nos produits ESD avec des composants soumis à la tension électrique.

### ALICATES PLIERS PINCES

Los alicates mini ESD EGA Master están fabricados en acero al Cr-V de alta calidad, que proporciona excelentes propiedades mecánicas y una alta precisión en los filos de corte. Los mangos bimateriales aseguran la disipación de la carga estática de manera segura y controlada, además de proporcionar un buen agarre ergonómico.

*EGA Master mini ESD pliers are made in high-quality Cr-V steel, which provides excellent mechanical properties and high accuracy in the cutting edges. The bimaterial handles ensure the vanishing of static charge in a safe and controlled way as well as comfortable ergonomic grip.*

Les MINI pinces ESD EGA Master sont fabriquées en acier Cr-V de haute qualité, qui confère d'excellentes propriétés mécaniques et une haute précision du fil de coupe. Les manches Bimat assurent la dissipation de la charge statique de manière sûre et contrôlée, et confèrent une bonne prise ergonomique.

### DESTORNILLADORES SCREWDRIVERS TOURNEVIS

Los destornilladores mini ESD EGA Master garantizan un trabajo seguro y cómodo, gracias a su mango disipador de carga electrostática, ergonómico, suave y cómodo para el uso. Las varillas están fabricadas en acero al Cr-V de alta calidad. Las puntas ofrecen un mecanizado de alta precisión y gran durabilidad, con un acabado cromado mate.

*EGA Master mini ESD screwdrivers guarantee a safe and comfortable work. Electrostatic discharge is facilitated due to their ergonomic and smooth dissipative handles. The blades are made in high-quality Cr-V steel. The tips are machined with high accuracy. The very durable blades are matt chromed.*

Les tournevis Mini ESD d'EGA Master garantissent un travail sûr et commode, grâce à leur manche ergonomique, doux et commode d'usage, éliminateur de charge électrostatique. Les lames sont fabriquées en acier Cr-V de haute qualité. Les pointes sont fraisées avec une grande précision et une grande durabilité, et une finition mâte.

ANTIDROP

**EGA Master fabrica una amplia y completa gama de herramientas y soluciones anti-caída ANTIDROP, que han sido diseñadas para controlar y prevenir la caída de objetos cuando se trabaja en alturas.**

Estos productos han sido desarrollados para ofrecer un uso cómodo, productivo y eficiente, garantizando al mismo tiempo la seguridad de los trabajadores y equipos contra la caída de objetos. Son ideales para muchas actividades de fabricación, construcción, instalación y mantenimiento tanto en tierra como mar adentro.

Son muchas las aplicaciones que requieren de trabajos en alturas: torres de perforación, turbinas eólicas, líneas eléctricas, grúas, edificios, andamiajes, puentes, torres de telecomunicaciones, mantenimiento de aviones, minería, espeleología...

**EGA Master manufactures a whole range of ANTI-DROP products and solutions that have been designed to control and prevent object dropping when working at height.**

*These products have been designed to allow a comfortable, productive and efficient use of tools while assuring workers' and equipment safety against object dropping. Ideal for many manufacturing, construction, installation and maintenance activities, both onshore and offshore. Some applications: oil rigs, wind turbines, power lines, cranes, buildings, scaffolding, bridges, telecom towers, airplane maintenance, speleology, mining...*

**EGA Master fabrique une gamme vaste et complète d'outils avec des solutions anti-chute ANTIDROP, conçue pour contrôler et prévenir la chute d'objets lors de travaux en hauteurs.**

Ces produits ont été développés pour obtenir une utilisation pratique, productive et efficace, garantissant en même temps, la sécurité des travailleurs et des équipes, contre la chute d'objets. Ils sont idéals pour diverses activités de fabrication, de construction, d'installation et de maintenance terrestre et maritime.

Les situations ayant besoin du système anti-chute sont nombreuses: les tours de forage, les éoliennes, les lignes électriques, les grues, les bâtiments, les échafaudages, les ponts, les tours de télécommunications, la maintenance des avions, les mines, la spéléologie...

**HERRAMIENTAS ANTI-CAÍDA ANTIDROP  
CON SISTEMA TERMORETRÁCTIL**  
*ANTIDROP TOOLS WITH HEAT SHRINK SYSTEM*  
**OUTILS ANTI-CHUTE ANTIDROP AVEC  
SYSTÈME THERMORÉTRACTABLE**

Las herramientas anti-caída ANTIDROP de EGA Master han sido cuidadosamente diseñadas no sólo para evitar caídas accidentales, sino para garantizar la seguridad completa. Todas las herramientas están equipadas con sistema termoretráctil mucho más eficaz y seguro que otros sistemas del mercado, como, por ejemplo, la sujeción de herramientas directamente mediante cordones y nudos que pueden fallar por errores humanos.

Por supuesto, todas las herramientas mantienen las características originales y reconocidas de las herramientas industriales de EGA Master: seguridad, resistencia, durabilidad, eficiencia, ergonomía y un uso cómodo.

*EGA Master ANTIDROP tools have been carefully designed not only to avoid accidental dropping, but also to ensure maximum safety. All tools are equipped with heat shrink system which offer superior safety compared to other systems, such as directly holding tools with a knot.*

*Of course, all tools keep the original and well-known EGA Master industrial tools features: safety, resistance, durability, efficient and comfortable use.*

Les outils anti-chute ANTIDROP d'EGA Master ont été soigneusement conçus, non seulement pour éviter des chutes accidentelles, mais aussi pour garantir la complète sécurité. Tous les outils sont dotés par un système thermorétractable, système beaucoup plus efficace et sûr que ceux existants sur le marché, comme par exemple la rétention directe d'outils par l'intermédiaire de cordons et de nœuds qui peuvent faire l'objet de défaillance par erreur humaine.

Il est évident que tous les outils gardent leurs caractéristiques originales et reconnues, des outils industriels d'EGA Master: sécurité, résistance, durabilité, efficacité, ergonomie et une utilisation confortable.

**CORDÓN ANTI-CAÍDA**  
**LANYARDS**  
**CORDON ANTI-CHUTE**

Diseñados para ofrecer la máxima seguridad, así como una óptima libertad de movimiento, los distintos sistemas proporcionan todas las soluciones necesarias para un uso cómodo y seguro en las alturas y al mismo tiempo aseguran la mejor absorción frente a impactos.

*Designed for maximum safety, as well as optimum working freedom, the various systems provide all required solutions for a comfortable and safe use on heights, while assuring best shock absorption.*

Conçus pour offrir la sécurité maximale, ainsi qu'une liberté de mouvement optimale, les différents systèmes offrent toutes les solutions nécessaires pour une utilisation pratique et sûre en hauteurs et en même temps assurent une meilleure absorption lors d'impacts.

**CINTURONES DE SEGURIDAD**  
**SAFETY BELTS**  
**CEINTURES DE SÉCURITÉ**

Diseñados para adaptarse a la perfección al cuerpo del trabajador, facilitan los movimientos del usuario, ofreciendo muchos y variados puntos de fijación para las herramientas. Los ganchos y bolsillos del cinturón sujetan las herramientas mientras el trabajador está en movimiento.

*Designed to fit the worker's body, enable user freedom and provide maximum tool fixing points. Internal hooks safely retain tools while the operator is climbing or moving location.*

Conçus pour s'adapter à la perfection au corps du travailleur, elles facilitent les mouvements de l'utilisateur en offrant une grande variété de points de fixation pour les outils. Les crochets et les poches de la ceinture supportent les outils pendant que le travailleur est en action.

**SISTEMA DE CONTROL DE HERRAMIENTAS**  
**TOOL CONTROL SYSTEM**  
**SYSTÈME DE CONTRÔLE D'OUTILS**

El control de herramientas es esencial en muchas aplicaciones, sobre todo en aquellos casos en los que las herramientas "perdidas" u olvidadas aumentan los riesgos y disminuyen la seguridad, como es el caso de reparaciones de aviones, mantenimiento de turbinas eólicas, construcciones en las alturas...

EGA Master ofrece como solución un exclusivo y personalizado sistema de control de herramientas. Simplemente hay que elegir las herramientas requeridas y EGA Master diseñará y fabricará el set necesario, totalmente personalizado, con bandejas bicolor que se adaptan perfectamente a las herramientas y permiten visualizar a golpe de vista la herramienta faltante. Para más información, dirigirse al capítulo "Sistemas de herramientas".

*Tool control is essential in many applications, specially on those where "forgotten" tools create high safety risks: airplane repair, wind turbine maintenance, construction at height...*

*EGA Master offers exclusive and totally customized tool control system solutions. Just decide which tools you need, and EGA Master will design and manufacture customized the set you require, with Bi-colored foam trays that perfectly fit tools and visually warn of any missing element. For more info, please check "Tool Control System" chapter.*

Le contrôle des outils est essentiel dans beaucoup d'applications, et surtout dans les cas où les outils "perdus" ou oubliés augmentent les risques et diminuent la sécurité, comme dans le cas de réparations d'avion, la maintenance d'éoliennes, les constructions en hauteurs...

EGA Master offre comme solution, un système exclusif et personnalisé de contrôle d'outils. Il suffit de sélectionner les outils désirés et EGA Master concevra et fabriquera le Set nécessaire, totalement personnalisé avec des plateaux bi-couleurs qui s'adaptent parfaitement aux outils et permettent de visualiser d'un simple coup d'œil l'outil manquant. Pour plus d'informations, se diriger au Chapitre "Systèmes de Contrôle d'Outils".

**SOLUCIONES ANTI-CAÍDA PARA HERRAMIENTA AISLADA 1.000V, ESD, ANTI-CHISPA O NO MAGNÉTICA**  
**ANTIDROP SOLUTIONS FOR 1000V INSULATED, ESD, NON-SPARKING OR NON-MAGNETIC TOOLS**  
**SOLUTIONS ANTI-CHUTE POUR DES OUTILS ISOLÉS 1000 VOLTS, ESD, ANTI-DÉFLAGRANTS ET AMAGNÉTIQUES**

Si usted requiere de herramienta de este tipo con el sistema anti-caída ANTIDROP incorporado, debido a sus propiedades especiales, por favor, póngase en contacto con EGA Master para asesorarle y ofrecerle la mejor solución posible.

*If you require such tools in ANTIDROP execution, due to their special properties, please do contact us to advice the best possible solution.*

Si vous avez besoin d'outils de ce type avec le système anti-chute ANTIDROP incorporé, et en raison de leurs propriétés spécifiques, merci de vous mettre en contact avec EGA Master pour une étude technique et vous offrir la solution la plus adaptée.

**EGA Master es miembro de DROPS, iniciativa global de colaboración intersectorial para el establecimiento de normas y soluciones para la prevención de caída de objetos, representada por las empresas más avanzadas y concienciadas en seguridad de los distintos sectores: Petróleo, Gas, Minería, Construcción, Fabricación, Seguridad, etc.**

Como miembro de dicha iniciativa, EGA Master diseña, ensaya, homologa, certifica y fabrica todas sus herramientas y sujeciones ANTIDROP (prevención frente a caídas) de acuerdo siempre a las últimas recomendaciones DROPS vigentes, asegurando los más altos estándares de seguridad frente a la caída de objetos. Todo ello en combinación con la calidad industrial de primer nivel de sus herramientas, garantiza que las soluciones ANTIDROP de EGA Master cumplan con las más altas exigencias de eficiencia, productividad, comodidad y seguridad.

*EGA Master is a member of DROPS, a global initiative for inter-sector collaboration for the establishment of standards and solutions to prevent falling objects, represented by companies that are the most advanced and safety aware across multiple sectors: such as Oil, Gas, Mining, Construction, Manufacturing, Safety, etc.*

*As a member of this initiative, EGA Master has designed, manufactured, tested, approved and certified all its ANTIDROP (prevention against falls) tools and accessories according to the latest standards of security and recommendations provided by DROPS,*

*ensuring the highest standards of security against falling objects. All this, combined with industrial class quality tools, ensures that EGA Master ANTIDROP solutions meet the highest standards of efficiency, productivity, comfort and safety.*

**EGA Master est membre de DROPS, initiative globale de collaboration intersectorielle pour l'établissement de normes et de solutions pour la prévention de chute d'objets, représentée par les entreprises les plus avancées et conscientes de l'importance de la sécurité dans les secteurs suivants: Pétrole, Gaz, industrie minière, Construction, Fabrication, Sécurité, etc.**

En tant que membre de telle initiative, EGA Master conçoit, essaie, homologue, certifie et fabrique tous ses outils et fixations ANTIDROP (prévention par rapport à la chute) toujours en accords aux dernières recommandations DROPS en vigueur, assurant les plus hauts standards de sécurité par rapport à la chute d'objets. Tout cela, combiné avec la qualité industrielle de premier niveau de ses outils, garantit que les solutions ANTIDROP d'EGA Master accomplissent les plus hautes exigences d'efficacité, de productivité, de commodité et sécurité.

|                                                              |                                                                          |                                                                            |

 **1000 V**  
**IEC 60900**

Existen áreas de trabajo en las que los trabajadores se exponen a la combinación de varios factores de riesgo en lo que a seguridad y salud se refiere: los trabajos bajo tensión eléctrica dentro de entornos que presenten algún tipo de agente explosivo (como, por ejemplo, gases o polvos). Esta situación puede darse, por ejemplo, en las siguientes aplicaciones:

- Fabricación de pila/baterías.
- Mantenimiento y reparación de baterías.
- Mantenimiento eléctrico en zonas ATEX.

Esta gama proporciona herramientas aisladas certificadas de acuerdo a la norma internacional IEC 60900, asegurando al mismo tiempo propiedades anti-chispa para zonas clasificadas como ATEX. En cuanto a dimensiones y diseño son idénticas a las herramientas de gran calidad de la gama anti-chispa de **EGA Master**, pero con el aislamiento necesario y adecuado para poder trabajar bajo tensión, por lo que se mantienen tanto las propiedades mecánicas como las de seguridad. Fabricadas en Al-Br y Cu-Be, ambas aleaciones están certificadas por el Instituto Federal Alemán BAM, acreditado por la Unión Europea para la aprobación de productos dirigidos a ambientes con riesgo de explosión.

*Certain working areas show 2 different health and safety risks: they show voltage tension, while the environment may have an explosive agent present (such as gases or dusts). Such areas may appear in:*

- Manufacturing of batteries
- Battery repair and maintenance
- Electrical maintenance in ATEX areas.

*The EGA Master Non-sparking 1000V insulated tool range provides safe insulated tools, certified according to international IEC 60900 standard, while assuring total non-sparking properties for ATEX classified areas. Tools are exactly the same shape and design as the high-quality EGA Master non-sparking tools, but with the necessary and adequate insulation for jobs under voltage. Manufactured in Al-Br or Cu-Be, both alloys are certified by the German Federal BAM Institution, accredited by the European Union for the approval of products to be used in explosion hazard environments.*

Ils existent des zones de travail dans lesquels les travailleurs s'exposent à divers facteurs risque, en termes de sécurité et de santé: les travaux sous tension électrique situés dans des environnements qui présentent un certain type d'agent explosif (comme par exemple les gaz ou la poussière). Cette situation peut se dérouler, par exemple, dans les applications suivantes:

- Fabrication de pile/batteries
- Maintenance et réparation de batteries
- Maintenance électrique en zones ATEX

Cette gamme fournit des outils isolés certifiés conforme à la norme internationale IEC 60900, fournissant également des propriétés anti-déflagrantes pour les zones classifiées ATEX. Quant aux dimensions et au design, ils sont identiques aux outils de grande qualité de la gamme antidéflagrante d'**EGA Master**, mais avec l'isolation nécessaire et adéquate pour travailler sous tension, raison pour laquelle autant les propriétés mécaniques que de sécurité sont préservées. Fabriqués en Al-Br et Cu-Be, les deux alliages sont certifiés par l'Institut Fédéral Allemand BAM, accrédité par l'Union Européenne pour l'agrément des produits destinés aux environnements avec risque d'explosion.

*If you can not find the size or tool you require please consult with us.*  
Si vous ne trouvez pas la dimension ou l'outils dont vous avez besoin, consultez-nous.

Las herramientas Antichispa **EGA Master** son la mejor alternativa para las aplicaciones en entornos de potencial explosivo. Incorporamos a nuestras herramientas antichispa todo nuestro conocimiento de décadas diseñando y fabricando herramientas de mano, ergonómicas, fáciles de usar y con el diseño más atractivo.

*EGA Master Non-Sparking Tools are the best alternative for non-sparking application purposes in potentially explosive environments. We incorporate to our non-sparking tools all our knowledge of decades designing and manufacturing hand tools, making the most ergonomic and nicest design for them.*

L'outillage anti-déflagrant **EGA Master** est la meilleure alternative pour l'application en milieux explosifs. Nous apportons notre longue expérience dans la conception et la fabrication d'outillage à main dans le domaine de l'ergonomie, de la facilité d'utilisation et du Design.

■ **NOTA IMPORTANTE / IMPORTANT NOTE / AVIS IMPORTANT**

Por sus características especiales de dureza y resistencia (sensiblemente inferiores a los que se pueden obtener en herramientas de acero), las herramientas antichispa no pueden ser garantizadas contra ninguna deformación ni rotura. Sólo se repondrán en concepto de garantía aquellas herramientas antichispa cuya dureza Brinell sea inferior (o exceda) a la indicada en nuestro catálogo: 311-408 Brinell en el caso de las fabricadas en Cobre-Berilio y 241-311 Brinell en las fabricadas en Aluminio Bronce.

*The hardness and resistance that can be achieved with the materials used to manufacture non-sparking tools is significantly lower than that which can be obtained in tools made of steel. Due to these special characteristics of the material employed, non-sparking tools can not be guaranteed against any deformation or breakage. Non-sparking tools will be replaced under guarantee only when the hardness of the damaged tool does not reach (or exceeds) the one indicated in our catalogue: 311-408 Brinell for those made in Copper-Beryllium and 241-311 Brinell for those made in Aluminum Bronze.*

Du fait de sa dureté et sa résistance spécifiques (sensiblement inférieures à celles d'outils en acier), les outils anti-déflagrants ne peuvent être garantis contre toute déformation ou rupture. Seulement seront pris en garantie, les outils anti-déflagrants dont la dureté est inférieure (ou excède) à celle indiquée dans notre catalogue: 311-408 Brinell pour le Cuivre - Béryllium et 241-311 Brinell pour l'Aluminium - Bronze.

| Dureza / <i>Hardness</i> / Dureté           | 311- 408 Brinell                                                                                                                                                                                                                                                                                                                                            | 241-311 Brinell                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Magnetismo / <i>Magnetism</i> / Magnétisme  | La ausencia férrea en la composición hace que sea más seguro cuando las aplicaciones no magnéticas son requeridas / <i>Non ferrous substance in the composition makes it safer when non-magnetic applications are required</i> / L'absence de substance ferrique dans sa composition, fait de lui un alliage plus sûr pour des utilisations non magnétiques | Mínimo componente de hierro hacen que no sea 100 % no magnético, aunque su bajo magnetismo lo hace apropiado para las aplicaciones de bajo magnetismo no críticas / <i>Minimum ferrous component makes them not 100% non-magnetic, although its low magnetism make it appropriate for non critical non-magnetic applications</i> / Le minimum de substance ferreuse fait qu'il n'est pas à 100% amagnétique, malgré tout, son faible magnétisme le rend approprié pour des travaux amagnétiques mais non critiques |
| Durabilidad / <i>Durability</i> / Longévité | Muy grande debido a la gran dureza y la resistencia a tracción. Grandes esfuerzos pueden ser proporcionados / <i>Much higher due to the higher hardness and tensile strength. Higher efforts can be made</i> / Grande longévité due à sa composition et à la dureté. Supporte des forces importantes                                                        | No tanto como el Cu-Be / <i>Not as much as Cu-Be</i> / Pas autant que le Cu-Be                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Precio / <i>Price</i> / Prix                | Gran precio debido al material especial usado / <i>Higher price due to the special raw material used</i> / Onérosité due aux matériaux spéciaux utilisés                                                                                                                                                                                                    | Sobre un 30 % más bajo / <i>Around 30% lower price</i> / Approx. 30% moins cher                                                                                                                                                                                                                                                                                                                                                                                                                                    |

■ **PRECAUCIÓN**  
**CAUTION**  
**PRÉCAUTION**

No usar herramientas que contengan más de un 65 % de cobre en contacto directo con acetileno debido a la posible formación de acetilida explosiva, especialmente en presencia de humedad.

Do not use high copper content tools (>65%) in direct contact with acetylene due to the possible formation of explosive acetylide, specially in the presence of moisture.

Ne pas utiliser les outils composés de cuivre (>65%), en contact direct avec l'Acétylène car il y a un risque d'explosion acétylétique surtout en présence d'humidité.

Las herramientas fabricadas en aleación Cobre-Berilio se pueden utilizar en todos los grupos (I, IIA, IIB y IIC) de manera segura, respetando siempre la temperatura máxima de superficie, excepto para el acetileno, porque el cobre reacciona con él creando gases de acetilina altamente explosivos.

*Tools made of Cu-Be alloy can be used in all groups (I, IIA, IIB, IIC) in a safe way, always respecting the maximum surface temperature allowed, with the only exception of acetylene, with which copper might react and create highly explosive acetylide gases.*

Le cuivre Béryllium peut être utilisé dans tous les cas d'une manière sûre, à condition que la température superficielle de l'outil ne dépasse pas le niveau de température pour chaque gaz. Ne pas utiliser en présence d'Acétylène, car le contact peut créer des étincelles explosives.

Las herramientas fabricadas en aleación Aluminio-Bronce se pueden utilizar en todos los grupos excepto en IIC (hidrogeno, gas de agua, acetileno, bisulfuro de carbono y nitrato de etilo), respetando siempre la temperatura máxima de superficie.

*Tools made of Al-Bronze alloy can be used in a safe way, always respecting the maximum surface temperature allowed, except for the IIC group (Hydrogen, gas of water, acetylene, bisulphide of carbon, Ethyl nitrate).*

L'aluminium-Bronze est sûr pour tous ces produits sauf pour le groupe IIC (gaz d'eau, Hydrogène, Acétylène, Bisulfure de carbone et Nitrato d'éthyle, encore que de tous ces gaz seul l'hydrogène est común), à condition que la température superficielle de l'outil ne dépasse pas le niveau de température pour chaque gaz.

## HERRAMIENTAS DE COBRE O LATÓN COPPER OR BRASS TOOLS OUTILS EN CUIVRE OU EN LAITON

**Las herramientas de cobre o latón son seguras en ambientes explosivos.**

EGA Master tiene disponible una gama completa de martillos y mazas de cobre y latón a disposición de los clientes.

Es conveniente saber que las herramientas de cobre o latón no pueden ser nunca considerados como sustitutos de las herramientas de aluminio-bronce o cobre-berilio, debido a que su dureza es muy inferior a la necesaria para la mayoría de aplicaciones. Existe la tentación de escoger herramientas en cobre o latón debido a su menor coste respecto a las aleaciones de aluminio-bronce o cobre-berilio. Esta opción no solo es peligrosa de por sí, sino que hará que a corto plazo tengamos que reemplazarlas por nuevas unidades debido al desgaste sufrido por sus bajas durezas.

Por tanto, las herramientas de cobre o latón deberían ser empleadas únicamente en aquellas aplicaciones que se deban llevar a cabo en zonas de riesgo de explosión, si la misma aplicación requiriese emplear herramientas de cobre o latón en un ambiente sin riesgo de explosión.

Si usted emplearía una herramienta de acero en una zona sin riesgo de explosión, entonces debe escoger por su seguridad y rentabilidad herramientas fabricadas en aluminio-bronce o cobre-berilio para realizar la misma labor en una zona de riesgo, nunca una herramienta de cobre o latón.

*EGA Master has available a complete range of copper and brass hammers and mallets made in both materials.*

*It is convenient to know that copper or brass tools can never be considered as alternatives to aluminum-bronze or copper-beryllium alloy tools, because their hardness is too low for most applications. There is the temptation to choose copper or brass tools due to their lower cost compared to aluminum-bronze or copper-beryllium ones. This choice is not only risky in itself, but in the short/mid term it will be necessary to replace them for new ones because they wear out fast.*

*For this reason, copper or brass tools should only be used in those jobs that have to be made in risky environments, if the same job would be made with copper or brass tools in a non-risky environment. In case you would use a steel tool in a non-risky environment, than you should choose for your safety and profitability tools made in aluminum-bronze or copper-beryllium to make the same job in a risky environment, never a copper or brass tool.*

**Copper or brass tools are safe in explosive environments.**

EGA Master a toute une gamme complète de marteaux et de masses en cuivre et en laiton au service des clients.

Il est important de savoir que les outils en cuivre ou en laiton ne peuvent jamais être considérés comme substituts des outils en aluminium-bronce ou en cuivre-béryllium, ceci du à une dureté bien inférieure à celle nécessaire pour la plus part des applications. La tentation de substituer l'alu-Br et le Cu-Bé par le cuivre ou le laiton existe, dû au coût plus bas. Cette option, non seulement est dangereuse, mais aussi peu rentable, car l'outillage en cuivre ou en laiton sera à remplacer à très court terme, car beaucoup moins résistant.

Mais les outils en cuivre ou en laiton devraient être uniquement utilisés pour des applications en zones de risques d'explosions, si le même usage était requis en atmosphère sans risque d'explosion.

Pour un emploi d'outils en acier en atmosphère sans risque d'explosion, alors pour votre sécurité et une meilleure rentabilité, vous devez prendre des outils fabriqués en Aluminium - Bronze ou en Cuivre - Béryllium pour des applications en zone de risque, jamais un outil en cuivre ou en laiton.

**Les outils en cuivre ou en laiton sont sûrs pour une utilisation dans des environnements explosifs.**

## ALEACIÓN ACETILEX, TRABAJO SEGURO INCLUSO EN AMBIENTES DE ACETILENO ACETILEX ALLOY, SAFE WORK EVEN IN ACETYLENE ENVIRONMENTS ALLIAGE ACETILEX, TRAVAIL SÛR MÊME EN PRÉSENCE D'ACÉTHYLÈNE

Los ambientes de acetileno hacen que no se puedan emplear elementos con composiciones de cobre superiores al 65 %. Ambas aleaciones aluminio-bronce y cobre-berilio tienen porcentajes de cobre superiores al 65 %. La razón no estriba en que una chispa de cobre berilio tenga la suficiente energía como para provocar la ignición del acetileno, sino que el cobre puede reaccionar con el acetileno creando acetiluros altamente explosivos de por sí. Por este motivo, se desaconseja el uso de cualquiera de las aleaciones de cobre berilio o aluminio bronce en ambientes de acetileno.

En EGA Master, siempre buscando soluciones innovadoras que aporten mayor seguridad, hemos desarrollado la aleación ACETILEX, 100 % segura en ambientes de acetileno. Una vez más, pioneros en seguridad.

*Items with copper composition higher than 65% should not be used in acetylene environments. Both aluminum bronze and copper-beryllium alloys do have copper compositions higher than 65%. The reason is not that copper beryllium can create a spark with enough energy to create the ignition of acetylene, but that copper reacts with acetylene creating highly explosive acetylides. For this reason, copper-beryllium or aluminum-bronze alloys should not be used in acetylene environments.*

*EGA Master, always committed to find new innovative solutions that will increase safety, has developed the ACETILEX alloy, 100% safe to be used in acetylene environments. Once again, pioneers in safety.*

Les atmosphères en présence d'acétylène font qu'on ne peut utiliser de compositions en cuivre supérieures à 65%. Les deux alliages aluminium - bronze et cuivre - béryllium ont un pourcentage de cuivre supérieur à 65%. La raison ne repose pas sur le fait que l'étincelle du cuivre-béryllium ait l'énergie suffisante pour provoquer l'ignition de l'acétylène, mais que le cuivre peut avoir une réaction avec l'acétylène, ce qui peut provoquer des particules acétylure hautement explosives. Pour cette raison, il est déconseillé l'utilisation d'alliages de cuivre béryllium ou d'aluminium bronze en présence d'acétylène.

En permanence à la recherche de solutions novatrices ayant la meilleure sécurité, EGA Master a développé l'alliage ACETILEX, 100% sûre en présence d'acétylène. Une fois de plus, pionniers en sécurité.

### INSTRUCCIONES DE USO Y GARANTÍA INSTRUCTIONS FOR USE & WARRANTY INSTRUCTIONS D'UTILISATION ET GARANTIE

- Las herramientas antichispa no pueden alcanzar la dureza de las herramientas convencionales. Por esta razón en su uso se debe tener un especial cuidado, sin sobreesfuerzos ni alta temperatura.  
*Non-Sparking Tools cannot reach the hardness of conventional tools. For this reason the use of Non-Sparking Tools has to be carried out with special care, avoiding overstraining, heating, etc.*  
L'outillage anti-déflagrant ne peut avoir la même dureté que l'outillage traditionnel. Pour cela, il requiert une attention spéciale, en évitant la surcharge, la chaleur...
- Si en toda llave/destornillador es imperativo emplear la medida correspondiente a la tuerca o tornillo, en el caso de las antichispa lo es aún con más razón, ya que si se usara indebidamente una de distinto tamaño al preceptivo, el efecto cizalla que se causaría, propiciaría su deterioro.  
*To avoid damage being caused to both tool and fastener, it is necessary to always ensure that the correctly sized spanner/wrench/screwdriver is selected. Due to the reduced strength and wear resistance of Non-Sparking Alloys the correctly sized tool becomes essential to avoid premature wear and early deterioration of the tool.*  
S'il est impératif dans tous tournevis/clés d'employer la dimension correspondante à l'écrou ou à la vis, il est encore plus vital dans le cas de l'anti-déflagrant, puisque s'il s'utilise de façon incorrecte la dimension obligatoire, l'effet cisaille causé favorisera sa détérioration.
- Durante trabajos en zonas clasificadas con riesgo de explosión, además de requerimientos relativos al uso de herramienta antichispa, deben tenerse en cuenta necesidades respecto de otros elementos tales como que el uso de maquinaria y artículos eléctricos/electrónicos con certificación ATEX, elementos de protección individual...  
*While carrying out works in areas classified with risk of explosion, in addition to the safety requirements related to the use of non-sparking tools, it also must be taken into account requirements related to other elements used, such as ATEX certification for machinery, electrical/electronic devices,... and also individual protection elements.*  
Lors de travaux dans des zones classées à risque d'explosion, en plus des exigences liées à l'utilisation d'outils antidéflagrants, certains besoins doivent être pris en compte concernant d'autres éléments tels que l'utilisation de machines et d'éléments électriques/électroniques avec certification ATEX, des éléments de protection individuelle...

## CERTIFICADO DE CONFORMIDAD

Certificamos que las herramientas antichispa fabricadas por EGA Master en **Aluminio-Bronce** cumplen con la Directiva Europea ATEX 1999/92/EC en las zonas de trabajo 1 y 2 (Gas, Vapor) y/o Zonas 21 y 22 (Polvo). Además, son seguras en grupos de explosión I, IIA, IIB, IIC (excepto acetileno por la formación química de acetileno explosiva) de acuerdo a la ISO/IEC 80079-20-1:2017.

### Composición química

**Al:** 10% - 12%

**Ni:** 4% - 6%

**Fe+Mn:** 5,8% - 7%

**Resto:** Cu+Al+Ni+Fe+Mn  $\geq$  99,0 %

### Dureza

241-311 Brinell

### Resistencia a la tracción

800 N/mm<sup>2</sup>

Certificamos que las herramientas **Cobre-Berilio** fabricadas por EGA Master cumplen con la Directiva Europea ATEX 1999/92/EC en las zonas de trabajo 1 y 2 (Gas, Vapor) y/o Zonas 21 y 22 (Polvo). Además, son seguras en grupos de explosión I, IIA, IIB, IIC (excepto acetileno por la formación química de acetileno explosiva) de acuerdo a la ISO/IEC 80079-20-1:2017.

### Composición química

**Be:** 1,8% - 2,3%

**Ni+Co:** > 0,2%

**Co+Ni+Fe:** < 1,2%

**Resto:** Cu+Be+Co+Ni+Fe  $\geq$  99,0 %

### Dureza

311- 408 Brinell

### Resistencia a la tracción

1250 N/mm<sup>2</sup>

## CERTIFICATE OF COMPLIANCE

We hereby certify that, EGA Master **Aluminum-Bronze** Tools fulfill the demand in the European ATEX Directive 1999/92/EC for work in Zones 1&2 (Gas, Mists or Vapors) and/or 21&22 (Dusts). EGA Master Aluminum-Bronze Tools are totally safe against explosion risk working in environments of all gases classified as Risk Groups I, IIA, IIB and IIC (except acetylene) according to ISO/IEC 80079-20-1:2017.

### Chemical composition percentage

**Al:** 10% - 12%

**Ni:** 4% - 6%

**Fe+Mn:** 5,8% - 7%

**Cu+Al+Ni+Fe+Mn  $\geq$  99,0 % Balance**

### Hardness

241-311 Brinell

### Tensile Strength-Break

800 N/mm<sup>2</sup>

We hereby certify that, EGA Master **Copper-Beryllium** Tools fulfill the demand in the European ATEX Directive 1999/92/EC for work in Zones 1&2 (Gas, Mists or Vapors) and/or 21&22 (Dusts). EGA Master Aluminum-Bronze Tools are totally safe against explosion risk working in environments of all gases classified as Risk Groups I, IIA, IIB and IIC (except acetylene) according to ISO/IEC 80079-20-1:2017.

### Chemical composition percentage

**Be:** 1,8% - 2,3%

**Ni+Co:** > 0,2%

**Co+Ni+Fe:** < 1,2%

**Cu+Be+Co+Ni+Fe  $\geq$  99,0 % Balance**

### Hardness

311- 408 Brinell

### Tensile Strength-Break

1250 N/mm<sup>2</sup>

EGA MASTER S.L.  
Aner Garmendia  
CEO at EGA Master

**CERTIFICADO DE SEGURIDAD ANTIEXPLOSIÓN**  
**ANTIEXPLOSION SAFETY CERTIFICATE**  
**CERTIFICAT DE SÉCURITÉ ANTI-EXPLOSION**

EGA Master certifica la seguridad de sus materiales por el prestigioso Instituto Federal Alemán para la Investigación y Examen de Materiales BAM, miembro notificado de la Unión Europea para la certificación según la Directiva 94/9/EG (ATEX).

*EGA Master non-sparking tools are certified by the prestigious German Federal Institute for Materials Research and Testing (BAM), which is a European Union approved laboratory to certify according to 94/9/EG Directive (Atex).*

La certificación des matériaux d'EGA Master est réalisée par le prestigieux Institut Fédéral Allemand d'investigation et d'examen des matériaux BAM, membre notifié par l'Union Européenne pour la certification selon la directive 94/9/EG (ATEX).

**Certificate**  
N°: **BAM/ZBF/008/10**  
3<sup>rd</sup> Revised version

Hereby it is confirmed by the BAM Certification Body, that the

**Material aluminium-bronze**

of the manufacturer

**EGA Master S.L.**  
**Zorrolleta 11, Jundiz Industrial Estate**  
**01015 Vitoria**  
**SPAIN**

meets the requirements of **BAM Standard operating procedure „StAA-NEG-005“: „StAA zur Schlagfunkenprüfung von Werkstoffpaarungen“ dated 2019-07-02** and thus the non-sparking tools made of this material are appropriate for use in potentially explosive atmospheres of zone 1 and/or 21 according to Directive 1999/92/EC of all explosion groups (I, IIA, IIB & IIC) according to ISO/IEC 80079-20-1:2017, if the terms and conditions set out in the annex to this certificate are met.

The certification is based on certification contract N° **BAM-ZBF-0004-2020-EGA dated 2020-08-26** and comprises according to standard ISO/IEC 17065:2012 a design-type test with the manufacturer's declaration of conformity (BAM Certification system I).  
The products certified by BAM may be labelled with the certification mark "BAM design-type tested" / "BAM Baumustergeprüft".

**The certificate is valid until 1 August 2025.**

BAM test report **20017926; BZ5-G5/024/20 dated 19 February 2021** as well as procedure no. **BZ5-G5/024/20** form the basis of this certificate.

Bundesanstalt für Materialforschung und -prüfung (BAM)  
Unter den Eichen 87, 12205 Berlin, **2021-02-23**

  
**Dr. J. Sunderkötter**  
 BAM Certification Officer

  
**Dr. R. Grätz**  
 BAM Assessor

Distribution list: 1st Certificate holder      2nd BAM Certification Body

This certificate may only be published in full wording and without any additions. A revocable written consent shall be obtained from BAM beforehand for any amended reproduction or the publication of any excerpts. The German version is legally binding, except an English version is issued exclusively. Place of jurisdiction is Berlin.

Sicherheit in Technik und Chemie

Tras revisión de la normativa en 2017, realizada por la institución alemana BG RCI (en la que el laboratorio BAM también ha participado) se prohíbe el uso de herramientas en las áreas de las zonas 0 y 20. En línea con dicho cambio, y a partir de dicha fecha, el organismo de certificación BAM no otorga certificaciones para dichas zonas 0/20.

*After a review of the regulations in 2017, carried out by the German institution BG RCI (in which the BAM laboratory has also participated), the use of tools in the areas of zones 0 and 20 is prohibited. In line with said change, and from After that date, the BAM certification body does not grant certifications for said zones 0/20.*

Après une révision de la réglementation en 2017, réalisée par l'institution allemande BG RCI (à laquelle le laboratoire BAM a également participé), l'utilisation d'outils dans les zones 0 et 20 est interdite. A partir de cette date, l'organisme de certification BAM n'accorde plus de certifications pour lesdites zones 0/20.

**DESIGNACIÓN Ex**  
**Ex DESIGNATION**  
**DÉSIGNATION Ex**
**ATEX**
**Atmósfera - Explosiva**
**Directiva 2014/34/UE**

Articula las disposiciones legales a tomar por los estados miembros para los aparatos y sistemas de protección diseñados para su uso en áreas potencialmente explosivas.

Nuevo: ATEX 114 (Antiguo: ATEX 95).

**Directiva 1999/92/CE**

Requerimientos mínimos para la mejora de la salud y la seguridad del trabajador en peligro ante atmósferas explosivas.

Nuevo: ATEX 153 (Antiguo: ATEX 137).

**ATEX**
**Explosive - Atmosphere**
**2014/34/UE Directive**

Harmonises legal provisions of member states for devices and protection systems for designated use in potentially explosive areas.

New: ATEX 114 (Old: ATEX 95).

**1999/92/CE Directive**

Minimum requirements for improving the health and safety protection of the worker at risk from explosive atmospheres.

New: ATEX 153 (Old: ATEX 137).

**ATEX**
**Atmosphère - Explosive**
**Directive 2014/34/UE**

Coordonne les dispositions légales à prendre dans les états membres pour les appareils et les systèmes de protection dessinés pour une utilisation dans des aires potentiellement explosives.

Nouveau: ATEX 114 (Ancien: ATEX 95).

**Directive 1999/92/CE**

Exigences minimum pour l'amélioration de la santé et de la sécurité du travailleur en danger dans des atmosphères explosives.

Nouveau: ATEX 153 (Ancien: ATEX 137).

**Ejemplos de denominación: / Designation examples: / Exemples de désignations:**

## T90°C

### Máxima temperatura superficial Max. surface temperature Température maximum en surface

(Dato facilitado para los aparatos usados en las áreas definidas como potencialmente explosivas por polvo - raramente también utilizado en las gaseosas.)

(Data for devices used in areas rendered potentially explosive by dust - rarely also used in gas ex marking.)

(Renseignnement donné pour les appareils utilisés dans les aires définies comme potentiellement explosives par la poussière et rarement utilisés dans des aires gazeuses.)

Máxima temperatura de una superficie en caso de fallo del aparato (o durante su uso normal en los aparatos de categoría 3) que puede ser alcanzada en una atmósfera Ex.

#### Evaluación por el usuario:

- Temperatura límite 1 = 2/3 de la temperatura mínima de ignición del polvo presente.
- Temperatura límite 2 = mínima temperatura de quemado del polvo presente menos 75 K (grados Kelvin) (se aplica para capas de polvo de espesores de hasta 5 mm).

El valor más pequeño de los límites de temperatura debe estar por encima de la máxima temperatura superficial indicada para el aparato.

Maximum temperature of a surface during a machine error (normal operation in the case of category 3 devices) that can be reached by the ex atmosphere.

#### Evaluation by the user:

- Limit temperature 1 = 2/3 of min. ignition temperature of dust present
- Limit temperature 2 = min. glow temperature of dust present minus 75k (applies for layer thicknesses of up to 5mm)

The smaller value for the limit temperature must be above the indicated max. surface temperature of the device.

Température maximale d'une surface qui peut être atteinte dans une atmosphère Ex. dans le cas d'une défaillance d'un appareil (ou durant son utilisation normale dans les machines de catégorie 3)

#### Evaluation par l'utilisateur:

- Température limite 1 = 2/3 de la température minimum d'ignition de la poussière présente
- Température limite 2 = température minimum de brûlure de la poussière présente moins de 75k (degrés Kelvin) (elle s'applique pour des couches de poussières jusqu'à 5mm)

La valeur la plus basse de température doit être au-dessus de la température maximale superficielle indiquée pour l'appareil.

## IP64

### Código IP IP Code Code IP

(Dato facilitado sólo para aparatos usados en las áreas definidas como potencialmente explosivas por polvo.)

(Data only for devices used in areas rendered potentially explosive by dust.)

(Renseignnement donné uniquement pour les appareils utilisés dans des aires définies comme potentiellement explosives par la poussière.)

#### Figura 1. Protección contra el contacto y cuerpos extraños:

- Protección contra depósitos de polvo
- Protección contra penetración de polvo

- Eau pulvérisée
- Jet d'eau
- Jet d'eau puissant
- Immersion temporaire
- Immersion continue

## DESIGNACIÓN Ex Ex DESIGNATION DÉSIGNATION Ex

### Protección frente a la explosión

Los principales principios para una segura e íntegra protección frente a la explosión son los siguientes:

1. Tomar medidas para evitar las atmósferas Ex siempre que sea posible.
2. Tomar medidas que prevengan la ignición de atmósferas Ex.
3. Tomar medidas que limiten los efectos de la explosión hasta un grado seguro.

### Esto se diferencia de:

#### Protección primaria frente a la explosión:

Tomar precauciones para prevenir o restringir la formación de atmósferas Ex explosivas.

#### Protección secundaria frente a la explosión:

Éste abarca el segundo grupo de medidas, las cuales tienen la intención de prevenir la ignición de una atmósfera capaz de explotar.

### Explosion Protection

The important principles for integrated safety explosion protection are as follows:

1. Measures are taken to avoid hazardous atmospheres whenever possible.
2. Measures are taken which prevent the ignition of hazardous atmospheres.
3. Measures are taken which limit the explosive effect to a safe degree.

### This differs from:

#### Primary explosive protection:

These are precautions taken to prevent or restrict the formation of hazardous explosive atmospheres.

#### Secondary explosive protection:

This covers the second group of measures, which are intended to prevent the ignition of an atmosphere that is capable of exploding.

### Protection contre l'explosion

Los principios les plus importants pour une protection sûre et entière contre l'explosion sont les suivants:

1. Adopter les mesures nécessaires pour éviter tant que possible la zone Ex
2. Prendre les mesures de prévention contre l'ignition en atmosphère Ex
3. Prendre les mesures qui limitent les effets de l'explosion à un niveau nul

### Celá se différencie de:

#### La protection primaire contre l'explosion:

Prendre des précautions pour prévenir ou réduire la formation d'atmosphères Ex explosives

#### La protection secondaire contre l'explosion:

Celui-ci comprend le second groupe de moyens, ceux qui ont l'intention de prévenir l'ignition d'une atmosphère qui peut exploser.

### División en Clases de Temperatura

La indicación de la clase de temperatura puede garantizarse sólo si se respeta la temperatura ambiente especificada para el aparato en uso (mirar datos técnicos o chapa de características). Su estricto cumplimiento es un requisito obligatorio.

Una vez que la máxima temperatura superficial de cualquier aparato alcance la temperatura de ignición de la atmósfera Ex circundante, puede ocurrir una explosión.

Debido a esto, todo equipo-material clasificado dentro del Grupo II se divide en clases de temperatura. Para tener en cuenta la posibilidad de atmósferas Ex potenciales, la temperatura de ignición más baja debe ser mayor que la máxima temperatura superficial.

### Division into Temperature Classes

The temperature class indication can be guaranteed only if the ambient temperature specified for the operating device is respected (see Technical Data or Rating Plate). Strict compliance is a mandatory requirement.

Once the maximum surface temperature of any apparatus reaches the ignition temperature of the surrounding hazardous atmosphere an explosion can occur.

Because of this, all equipment classified to Group II is divided into temperature classes. To allow for the possibility of potential hazardous atmospheres, the lowest ignition temperature must always be higher than the maximum surface temperature.

### Division en classes de températures

L'indication de la classe de température peut être garantie uniquement si nous respectons la température ambiante, spécifiée pour l'appareil en fonctionnement (voir les renseignements techniques ou la table de caractéristiques). Son application stricte est une obligation.

Quand la température superficielle maximale de tout appareil atteint la température d'ignition de l'atmosphère Ex circulant, il peut se produire une explosion.

C'est pour cela, que tout équipement - matériel classifié dans le Groupe II, est divisé en classes de températures. Pour prendre en compte, la possibilité d'atmosphère Ex potentielle, la température d'ignition la plus basse doit être supérieure à la température maximale superficielle.

| Clases de temperatura de gases inflamables y vapores y temperaturas superficiales permitidas del aparato en uso de acuerdo con la DIN EN 50014<br><i>Temperature classes of flammable gases and vapours and permitted surface temperatures of the operating device in accordance with DIN EN 50014</i><br>Classes de températures de gaz inflammables et de vapeurs et de températures superficielles autorisées pour l'appareil utilisé en accord avec la norme DIN EN 50014 |                                                                                                                  |                                                                                                                           |                                                                                   |                                                                                                |      |                                                                        |

| Temperatura de ignición (°C)<br><i>Ignition temperature in °C</i><br>Température d'ignition (°C)                                                                                                                                                                                                                                                                                                                                                                              | >450                                                                                                             | >300                                                                                                                      | >200                                                                              | >135                                                                                           | >100 | >85                                                                    |
| Máxima temperatura superficial (°C)<br><i>Maximum temperature in °C</i><br>Température maximum superficielle (°C)                                                                                                                                                                                                                                                                                                                                                             | 450                                                                                                              | 300                                                                                                                       | 200                                                                               | 135                                                                                            | 100  | 85                                                                     |
| Ejemplos:<br><i>Examples:</i><br>Ejemplos:                                                                                                                                                                                                                                                                                                                                                                                                                                    | Propano / <i>Propane</i> / Propane<br>Metano / <i>Methane</i> / Méthane<br>Amoniaco / <i>Ammoniac</i> / Ammoniac | Etileno / <i>Ethylene</i> / Ethylène<br>Alcoholes / <i>Alcohols</i> / Alcools<br>Acetileno / <i>Acetylene</i> / Acétylène | Petróleo / <i>Petrol</i> / Pétrole<br>Disolventes / <i>Solvents</i> / Dissolvants | Etilétero / <i>Ethylether</i> / Etiléther<br>Acetaldehído / <i>Acetaldehyde</i> / Acetaldehyde | -    | Disulfuro de carbono / <i>Carbon-disulphide</i> / Disulfure de carbone |

Las explosiones dependen de muchos parámetros.

Sólo para condiciones atmosféricas y sustancias puras se muestran valores y datos suficientemente comparativos. Una explosión puede ocurrir solamente donde una sustancia inflamable en forma de gases, vapores, humos y polvo se encuentra con suficiente oxígeno para alimentar la combustión y allí es donde se localiza la fuente de ignición.

#### Ejemplo:

Hidrógeno: entre 4,0 y 77,0 % en aire  
 Propano: entre 1,7 y 10,6 % en aire  
 Amoniaco: entre 15,4 y 33,6 % en aire  
 Metano: entre 4,4 y 16,5 % en aire

Explosions are dependent on many parameters.

Only for atmospherical conditions and pure substances sufficient comparative values and data are shown. An explosion can only occur where a flammable substance in the form of gases, vapours, smoke and dust exists along with sufficient oxygen to support -combustion and there is a source of ignition.

#### E.g.:

Hydrogen: 4,0 to 77,0 % in air  
 Propane: 1,7 to 10,6 % in air  
 Ammonia: 15,4 to 33,6 % in air  
 Methane: 4,4 to 16,5 % in air

Les explosions dépendent de beaucoup de paramètres.

Uniquement pour des conditions atmosphériques et des substances pures nous pouvons montrer des valeurs et des données suffisamment comparables. Une explosion peut se produire uniquement en présence de substances inflammables sous forme de gaz, de vapeurs, de fumées et de poussières, avec suffisamment d'oxygène pour alimenter la combustion, c'est, là que se trouve la source de l'ignition.

#### Exemple:

Hydrogène: entre 4,0 et 77,0 % dans l'air  
 Propane: entre 1,7 et 10,6 % dans l'air  
 Ammoniac: entre 15,4 et 33,6 % dans l'air  
 Méthane: entre 4,4 et 16,5 % dans l'air

## FUNDAMENTOS DE LA PROTECCIÓN FRENTE A LA EXPLOSIÓN DE POLVO

### FUNDAMENTALS OF DUST EXPLOSION PROTECTION

### BASES DE LA PROTECCIÓN CONTRA L'EXPLOSION DE POUSSIÈRES

#### Principios fundamentales:

El fabricante de aparatos en uso en áreas definidas como potencialmente explosivas por causas del polvo debe indicar la máxima temperatura superficial de todos los aparatos en los que el polvo pueda penetrar (usualmente expresado en °C –la indicación de la clase de temperatura debería evitarse aquí). Esta temperatura es parte de la denominación Ex.

#### Ejemplos de denominación:

⊕ II 2 D T90°C IP64

(Si el tipo de protección frente a la ignición está basado en la carcasa, el ratio de protección de la carcasa debería también estar indicado por un código IP.)

o

⊕ II 2 D Ex iaD 21 T96°C

(Este aparato ya ha sido aprobado de acuerdo al nuevo estándar legal IEC “Seguridad Intrínseca del Polvo”) – “iaD”. Este estándar legal especifica que la denominación también contenga la zona correspondiente –en este caso 21).

#### Protección frente a la explosión de polvo - temperatura:

Los parámetros de combustión y explosión para el polvo dependen de su condición. Los parámetros que afectan al comportamiento de la combustión y la explosión incluyen el tamaño de las partículas, la forma de las partículas, el contenido de agua, la pureza y donde sea aplicable, el contenido de disolventes inflamables. La distribución del tamaño de las partículas y el valor medio (valor promedio de los tamaño de partícula) debería también ser conocido.

De acuerdo con la Directiva 1999/92/EG (ATEX 153, reemplazando a: ATEX 137), el operario del sistema/empleo está obligado a hacer una evaluación sobre el peligro y debe por tanto saber la mínima temperatura de quemado del polvo.

Existen simples cálculos para determinar las dos “temperaturas” y son:

- Temperatura límite 1 = 2/3 de la temperatura mínima de ignición.
- Temperatura límite 2 = temperatura mínima de ignición \* menos 75K.

Estas 2 temperaturas límite deben ser examinadas para confirmar cuál de ellas garantiza la mayor seguridad.

#### Ejemplo 1:

Temperatura mínima de ignición = +330 °C

Temperatura mínima de quemado = +300 °C

- Temperatura límite 1 =  $2/3 \times +330 \text{ °C} = +220 \text{ °C}$
- Temperatura límite 2 =  $+300 \text{ °C} - 75\text{K} = +225 \text{ °C}$

#### Fundamental principles:

The manufacturer of operating devices for areas rendered potentially explosive through dust must indicate the maximum surface temperature of all devices that dust can penetrate (usually expressed in °C –indication of the temperature class should be avoided here). This temperature is part of the dust Ex-designation.

#### Designation examples:

⊕ II 2 D T90°C IP64

(If the ignition protection type is based on the housing, the housing protection rating should also be stated as an IP Cede.)

or

⊕ II 2 D Ex iaD 21 T96°C

(This device has already been approved according to the new IEC de-jure standard “Intrinsic Dust Safety”) – “iaD”. This de jure standard specifies that the designation also contains the corresponding zone –in this case 21.)

#### Dust explosion protection - temperature:

Combustion and explosion parameters for dusts depend on their condition. Parameters that affect combustion and explosion behaviour include particle size, particle shape, water content, purity and where applicable the content of the flammable solvents. The particle size distribution and the mean value (value for average particle size) should also be known.

In accordance with 1999/92/G Directive (ATEX 153, replacing: ATEX 137), the system operator/employer is obliged to make a hazard assessment and must therefore be aware of the minimum glow temperature of the dust.

There are simple calculations to determine the two “temperatures” and they are carried out thus:

- Limit temperature 1 = 2/3 of minimum ignition temperature
- Limit temperature 2 = minimum ignition temperature \* minus 75°K

These two limit temperatures must now be examined to confirm which guarantees the greater safety.

#### Example 1:

Minimum ignition temperature = +330°C

Minimum glow temperature = +300°C

- Limit temperature 1 =  $2/3 \times +330 \text{ °C} = +220 \text{ °C}$
- Limit temperature 2 =  $+300 \text{ °C} - 75\text{K} = +225 \text{ °C}$

Greater safety:

Limit temperature (1) = +220°C

Here a device with a max. surface temperature in the event of failure  $\leq +220 \text{ °C}$  must be used.

#### Principes fondamentaux:

Le fabricant de matériel, destiné aux aires définies comme potentiellement explosives à cause de la poussière, doit indiquer la température maximum superficielle sur tous les appareils, à laquelle la poussière peut entrer (normalement exprimée en °C –l’indication de la classe de température devrait être évitée). Cette température fait partie de la désignation Ex.

#### Exemples de désignations:

⊕ II 2 D T90°C IP64

(Si le type de protection contre l’ignition est sur la carcasse, le ratio de protection de la carcasse devrait aussi être indiqué par un code IP.)

ou

⊕ II 2 D Ex iaD 21 T96°C

(Cet appareil a été déjà certifié suivant la nouvelle norme légale IEC “Sécurité intrinsèque de la poussière”) – “iaD”. Cette norme légale spécifie que la désignation inclut aussi la zone correspondante, dans ce cas 21.)

#### Protection contre l’explosion de poussière - température:

Les paramètres de combustion et d’explosion de la poussière dépendent de sa forme. Les paramètres qui conditionnent le comportement de la combustion et de l’explosion, incluent la taille, la forme des particules, le contenu de l’eau, la pureté et son lieu d’application, le contenu des dissolvants inflammables. La répartition de la dimension des particules et la valeur moyenne (valeur moyenne de la taille des particules) devrait être aussi connue.

En accord avec la directive 1999/92/EG (ATEX 153, remplaçant: ATEX 137), l’opérateur du système/employé est obligé de faire une évaluation du risque et doit connaître au minimum la température minimale de combustion de la poussière.

Il existe de simples calculs pour déterminer les deux “températures” et ce sont:

- Température limite 1 = 2/3 de la température minimale d’ignition
- Température limite 2 = température minimale d’ignition \* moins 75K

Ces deux températures minimales doivent être connues pour confirmer laquelle fournit la plus grande sécurité

#### Exemple 1:

Température minimum d’ignition = +330°C

Température minimum de combustion = +300°C:

- Température limite 1 =  $2/3 \times +330 \text{ °C} = +220 \text{ °C}$
- Température limite 2 =  $+300 \text{ °C} - 75\text{K} = +225 \text{ °C}$

Plus grande sécurité:

Température limite (1) = +220°C

Mayor seguridad:

Temperatura límite (1) = +220 °C

Aquí debe usarse un aparato con una temperatura superficial máxima en caso de fallo  $\leq +220$  °C. Según lo indicado, la denominación del aparato incluye el valor correspondiente.

#### Ejemplo 2:

Temperatura mínima de ignición = +186 °C  
 Temperatura mínima de quemado = +180 °C

- a) Temperatura límite 1 =  
 $2/3 \times +186$  °C = +124 °C
- b) Temperatura límite 2 =  
 $+180$  °C - 75K = +105 °C

Mayor seguridad:

Temperatura límite (2) = +105 °C

Aquí debe usarse un aparato con una temperatura superficial máxima en caso de fallo  $\leq +105$  °C.

- \* El valor para la temperatura de quemado se aplica con capas de polvo de espesores de 5 mm. La temperatura de seguridad debe incrementarse para mayores espesores de capa.

#### Caso especial - Aparatos de Categoría 3

A diferencia de los aparatos de Categoría 1 y 2, para los aparatos de Categoría 3 (de uso solamente en las Zonas 2 y 22 respectivamente) no deben tenerse en cuenta los peligros potenciales en caso de fallo (cortocircuitos, conexiones rotas, etc.). El aparato se evalúa solamente respecto a los peligros durante un funcionamiento normal. Es relativamente poco probable que el aparato falle al mismo tiempo que se presenta una breve atmósfera explosiva. Por lo tanto no se requiere ningún Certificado de Test de Aprobación del Tipo EC para los aparatos de Categoría 3. El fabricante puede confirmar que el aparato en uso cumple con el pertinente estándar. Sin embargo, los aparatos EGA Master de Categoría 3 están todavía siendo probados por un centro de certificación y EGA Master está por ello concediendo declaraciones de conformidad. (Naturalmente, los aparatos de Categoría 2 también ofrecen una significativa seguridad en las Zonas 2 y 22 respectivamente).

As stated, the device designation includes a corresponding value.

#### Example 2:

Minimum ignition temperature = +186 °C  
 Minimum glow temperature = +180 °C:

- a) Limit temperature 1 =  
 $2/3 \times +186$  °C = +124 °C
- b) Limit temperature 2 =  
 $+180$  °C - 75°K = +105 °C

Greater safety:

Limit temperature (2) = +105 °C

Here a device with a max. surface temperature in the event of failure  $\leq +105$  °C must be used.

- \* The value for the glow temperature applies with a dust layer thickness of 5mm. The temperature safety distance must be increased for larger layer thicknesses.

#### Special case - Category 3 devices

In contrast to Category 1 and 2 devices, potential hazards in the event of failure (e.g. short circuiting, connection break etc.) do not have to be considered for Category 3 devices (for use only in Zones 2 respectively 22). The device is evaluated only in respect of hazards during normal operation, it is relatively unlikely that the device should fail at the same time as a short-term explosive atmosphere is present. No EC Type Approval Test Certificate is therefore required for Category 3 operating devices. The manufacturer may confirm that the operating device complies with the relevant standard. Nonetheless, EGA Master Category 3 devices are still tested by a certified centre and. EGA Master is then awarded a declaration of conformity. (Of course, Category 2 operating devices also offer significantly greater safety in Zones 2 respectively 22.)

Dust explosions – albeit of a predominantly minor nature – occur relatively frequently.

A leaflet issued by the Government Safety Organisation of the Federal Republic of Germany states:

"According to documentation published by property insurers, it can be assumed that an average of one dust explosion per day occurs in the Federal Republic of Germany; around one in four of these explosions are caused by foodstuff or animal feed dusts."

Ici, nous devons utiliser un appareil d'une température maximale superficielle en cas de problème  $\leq +220$  °C. Suivant l'indication, la dénomination de l'appareil inclut la valeur correspondante.

#### Exemple 2:

Température minimale d'ignition = +186 °C

Température minimum de combustion = +180 °C:

- a) Température limite 1 =  
 $2/3 \times +186$  °C = +124 °C
- b) Température limite 2 =  
 $+180$  °C - 75K = +105 °C

Plus grande sécurité:

Température limite (2) = +105 °C

Dans ce cas nous devons utiliser un appareil avec une température superficielle maximum en cas de problème de  $\leq +105$  °C.

- \* La valeur pour la température de combustion s'applique sur les couches de poussière les plus épaisses de 5 mm. La température de sécurité doit être augmentée pour de plus grandes épaisseurs de couche.

#### Cas particulier - Appareils de Catégorie 3

A la différence des appareils de catégories 1 et 2, pour les appareils de catégorie 3 (d'utilisation uniquement en zones 2 et 22 respectivement) nous ne prenons pas en compte les dangers potentiels dus aux pannes (courtcircuits, connexions défectueuses, etc.). L'appareil est uniquement évalué pour les dangers en fonctionnement normal. Il est relativement peu probable que l'appareil aie un problème en même temps que la présence brève d'une atmosphère explosive. Le Certificat de Test de contrôle du type EC n'est pas obligatoire pour les appareils de catégorie 3. Le fabricant peut confirmer que l'appareil utilisé remplit les conditions de la norme. Mais, les appareils EGA Master de Catégorie 3 sont testés par un centre de certification et c'est pour cela qu'EGA Master délivre une déclaration de conformité. (Naturellement, les appareils de catégorie 2 offrent aussi une sécurité significative dans les Zones 2 et 22 respectivement).

#### ■ EXPLOSIONES DE POLVO POR TIPO DE POLVO DUST EXPLOSIONS BY DUST TYPE EXPLOSIONS DE POUDRE PAR TYPE DE POUDRE

#### ■ FUENTES DE IGNICIÓN DE APARATOS ELÉCTRICOS IGNITION SOURCES BY ELECTRICAL OPERATING DEVICE TYPE SOURCES D'IGNITION D'APPAREILS ÉLECTRIQUES

Las explosiones por polvo –aunque su existencia sea de naturaleza menor– ocurren relativamente con mucha frecuencia.

Un folleto informativo de la Organización Gubernamental de la Salud de la República Federal de Alemania afirma:

“De acuerdo a la documentación publicada por las aseguradoras, se establece que ocurre por media una explosión por polvo al día en la República Federal de Alemania, de las cuales una cuarta parte es causada por polvos de alimentación.”

Las explosiones por polvo son un problema global. En EE.UU., entre 1980 y 1990, por ejemplo, se registraron alrededor de 200 explosiones por polvo serias con polvos de alimentación, siendo causa de 54 muertes, 256 heridos y un daños a la propiedad de más de 165 millones de dólares.

Las fuentes de ignición de aparatos eléctricos representan solamente una pequeña proporción de las causas de ignición por polvo existentes –debido principalmente a las medidas de seguridad establecidas para la construcción de plantas eléctricas en zonas potencialmente explosivas.

La introducción de la regulación en plantas eléctricas en áreas potencialmente explosivas –ElexV" [1.4]– en 1980 especificó un tipo de certificado para los instrumentos eléctricos usados en la Zona 10 (desde 01.07.2003 en las Zonas 20 y 21).

Los instrumentos “protegidos contra explosiones por polvo”, cuya temperatura superficial permanece por debajo del límite aceptable para una capa de polvo estandarizada de 5 mm, pueden, aun cuando exista un certificado oficial, convertirse en fuente de peligro si, contrariamente a las condiciones, se cubren completamente por una capa espesa de polvo.

*Dust explosions are a world-wide problem. Between 1980 and 1990 in the USA, for example, some 200 serious foodstuff or animal feed related dust explosions were recorded, causing 54 deaths, 256 injuries and property damage amounting to 165 million US dollars.*

*Electrical operating devices represent only a small proportion of the ignition sources found to cause dust explosions –not least due to the safety stipulations in the regulations for erecting electrical plants in potentially explosive areas.*

*The introduction of the (Regulation on electrical plants in potentially explosive areas) –ElexV" [1.4]– in 1980 specified a type examination certificate for electrical operating devices used in Zone 10 (from 01.07.2003 in Zones 20 and 21).*

*“Dust explosion-protected” operating devices, the surface temperatures of which lies below the acceptable limit for standardised dust thickness of 5mm, can, despite the existence of an official test certificate, become a danger source if, contrary to the conditions, they become covered or completely encased with a thick layer of dust.*

Les explosions par la poussière –malgré que leurs existences à l'état naturel ne sont pas fréquentes– elles se produisent relativement souvent.

Un dossier d'information de l'Organisation Gouvernementale de la Santé de la République fédérale allemande affirme que:

“Conformément à la documentation publiée para les compagnies d'Assurance, il est établi qu'il se produit chaque jour, en RFA, une explosion par la poussière, dont d'entre elles sont provoquées par des poussières alimentaires.”

Les explosions par la poussière sont un problème global. En EEUU, entre 1980 et 1990, par exemple, furent dénombrées plus de 200 explosions sérieuses par la poussière alimentaire, provoquant 54 morts, 256 blessés et des destructions matérielles évaluées à 165 millions de dollars.

Les sources d'ignition d'appareils électriques représentent uniquement une petite proportion des causes d'ignition par les poussières existantes –Cela du principalement aux mesures de sécurité établies pour la construction d'usines électriques en zones potentiellement explosives.

L'introduction de la régulation dans les usines électriques dans des aires potentiellement explosives –ElexV" [1.4]– en 1980 précisa un type de certificat pour les appareils électriques utilisés en zone 10 (depuis 01.07.2003 dans les zones 20 et 21).

Les appareils “protégés contre les explosions par la poussière”, dont la température superficielle reste au-dessous de la limite acceptable pour une couche de poussière d'une épaisseur standardisée de 5mm, peuvent, quand il existe un certificat officiel, devenir une source de danger si, contrairement aux conditions ils sont totalement couvert d'une épaisse couche de poussière.

## TIPOS DE PROTECCIÓN CONTRA IGNICIÓN

### TYPES OF IGNITION PROTECTION

### TYPES DE PROTECTIONS CONTRE L'IGNITION

#### Tipo de ignición “n”

La protección contra ignición n se puede aplicar únicamente para aparatos de la categoría 3, empleados en áreas clasificadas como potencialmente explosivas por gases. Como aquí no se considera la operación normal y no se contemplan fallos de equipo, se dan pocas diferencias en la designación del tipo de protección contra ignición:

- nA Equipo eléctrico antichispa (máquinas rotativas, fusibles, lámparas, indicadores y equipamiento de baja energía).
- nC Equipos con generación de chispa o altas temperaturas superficiales en condiciones operativas.
- nR Carcasa a prueba de vapores.
- nL Equipamientos y circuitos de baja energía.
- nP Carcasa contra sobrepresiones.

#### Ignition protection type “n”

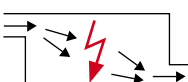

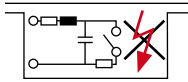

*Ignition protection type n is applicable for Category 3 operating devices used in areas rendered potentially explosive by gases. Because only normal operation and no equipment failures are considered here, small differences occur in the designation for ignition protection type:*

- nA Non-sparking electrical equipment (revolving machines, fuses, lamps, gauges and equipment with low energy).
- nC Sparking equipment or equipment with hot surface under operating conditions (dosed indexing mechanism and non-ignitable components, air-tight equipment, leak-proof sealed equipment).
- nR Vapour-proof casing.
- nL Equipment and circuit with limited energy.
- nP Simplified overpressure casing.

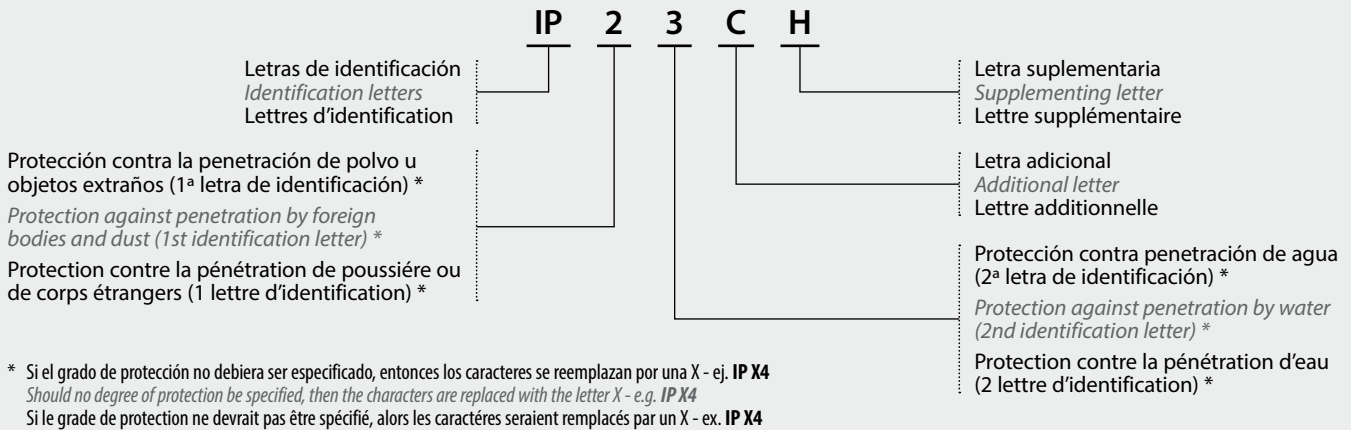

#### Type d'ignition “n”

La protección contra la ignición no puede ser aplicada únicamente para los aparatos de categoría 3, utilizados en áreas clasificadas como potencialmente explosivas por los gases. Como aquí, la operación no es considerada normal, y no tenemos en cuenta las fallas de los equipos, y hay pocas diferencias en la designación del tipo de protección contra la ignición:

- nA Equipamiento eléctrico anti-déflagrante (máquinas rotativas, fusibles, lámparas, indicadores y equipamiento de baja tensión)
- nC Equipamientos generadores de étincelas o de altas temperaturas superficiales en condiciones operativas.
- nR Carcasa a la prueba de los vapores.
- nL Equipamientos y circuitos de baja tensión.
- nP Carcasa contra las sobrepresiones.

## DIVISION POR ZONAS DIVISION INTO ZONES DIVISION PAR ZONES

### La seguridad es nuestra primera prioridad

En todos los lugares donde se produzcan, procesen, transporten o almacenen sustancias inflamables, la seguridad es extremadamente importante, especialmente en las industrias químicas y petroquímicas, en la producción de petróleo y gas natural y en la minería.

Con el objetivo de proveer el mayor nivel de seguridad, la mayoría de las legislaciones estatales han desarrollado leyes y regulaciones al respecto. En un entorno cada vez más globalizado, se han dado pasos importantes en la estandarización y puesta en común de las guías a seguir en la protección contra explosiones. Es la Unión Europea la que abanderó este camino. La directiva 94/9/EG supuso el comienzo hacia la unificación. Desde el 1 de julio de 2003 todos los aparatos deben estar aprobados según esta directiva.

#### Significado de la clasificación por zona:

- **Zona 0/20:** Peligro presente en todo momento, por largos periodos de tiempo o frecuentemente.
- **Zona 1/21:** Peligro presente ocasionalmente.
- **Zona 2/22:** Peligro presente de forma poco frecuente o por corto espacio de tiempo.

### Safety is our first priority

At all places where inflammable substances are produced, processed, transported or stored, safety is extremely important, especially in the chemical and petrochemical industry, in oil and natural gas production and in mining.

In order to provide the highest level of safety possible, most state's legislations have developed corresponding conditions in the form of laws, regulations and standards. In the course of globalisation, enormous progress could be made in uniform guidelines for explosion protection. It is the European Union that is leading the way. The 94/9/EG guideline lays the foundation for a complete unification. As of 01 July 2003, all new devices must be approved in accordance with this guideline.

#### Meaning of the zone classification:

- **Zone 0/20:** Danger is always present, for a long time or frequently.
- **Zone 1/21:** Danger is occasionally present.
- **Zone 2/22:** Danger is seldom present or present for a short time.

### La sécurité est notre première priorité

Dans tous les lieux où on produit, transforme, transporte ou emmagasine des substances inflammables, la sécurité est extrêmement importante, spécialement dans l'industrie chimique et pétrochimique, dans la production de pétrole et de gaz et dans les mines.

Ayant pour objectif d'atteindre le plus haut niveau de sécurité, la plus grande partie des législations étatiques, a développé des lois et des réglementations à ce sujet. Dans un environnement toujours plus globalisé, de grands pas ont été faits pour la normalisation et la mise en commun des chemins à suivre pour la protection contre les explosions. C'est l'Union Européenne qui a initié ce chemin. La directive 94/9/EG fut mise en oeuvre lors de l'unification. Depuis le 1<sup>er</sup> juillet 2003 tous les appareils doivent être approuvés suivant cette directive.

#### Signification de la classification par zone:

- **Zone 0/20:** Danger présent à tout moment, par longues ou fréquentes périodes.
- **Zone 1/21:** Danger présent occasionnellement.
- **Zone 2/22:** Danger présent peu fréquent ou sur de très courtes durées.

■ MASTEREX 76897

**COMUNICACIÓN EN LAS ZONAS EX**

El Radiotransmisor MasterEX 76897 cumple con las últimas normas y puede usarse en áreas con evaluaciones de protección Ex II 2G Ex ib IIC T4 Gb en las Zonas 1 y 2, de acuerdo con las directivas ATEX.

Esta radio profesional opera en banda de frecuencia UHF 400-470 MHz. El poder de transmisión de la radio se ha limitado a 1 vatio por seguridad en el trabajo en las áreas potencialmente explosivas y la iniciación de llamadas a grandes distancias.

Además, el MasterEX 76897 cumple con IP68 y por consiguiente satisface las altas demandas industriales en robustez y fiabilidad, particularmente en áreas de riesgo Ex.

El MasterEx 76897 utiliza tecnologías analógicas y digitales DRM garantizando la compatibilidad con los sistemas de radio analógicos existentes y aprovechando los beneficios de las comunicaciones digitales.

El MasterEx 76897 es compatible con el modo digital Trabajador Solitario, Hombre Caído y Botón de Emergencia con interrupción de llamadas como funciones programables. Estos tres niveles de seguridad aseguran que se active una alarma, incluso si el canal ya está ocupado.

Todos los parámetros para las funciones del MasterEX 76897 pueden cómodamente ajustarse en un PC usando el juego de software correspondiente y también pueden salvarse para programar diversas unidades. El trabajo es así minimizando y se asegura que todas las radios armonizan entre sí.

**COMMUNICATION IN EX-AREAS**

*The Two-way-radio MasterEX 76897 meets the latest standards and can be used in areas with protection assessments Ex II 2G Ex ib IIC T4 Gb in Zone 1 and 2, according to the ATEX directives.*

*This professional radio operates in frequency band UHF 400-470 MHz. The radio's transmission power has been limited to 1 watt for safe working in potentially explosive areas and initiating calls even over large distances.*

*In addition, the MasterEX 76897 complies with IP68 and therefore satisfies high industrial demands on ruggedness and reliability, particularly in ex-hazardous areas.*

*The MasterEx 76897 utilizes both analogue and DMR digital technologies ensuring backwards compatibility with existing analogue radios and taking advantage of the benefits of digital communications.*

*The MasterEx 76897 supports digital mode Lone-Worker, Man-Down and Emergency Button with call interrupt as programmable features. These three levels of safety ensure an alarm is raised, even if the channel is already busy.*

*All parameters for the MasterEX 76897 functions may be comfortably set on a PC using the corresponding software kit and can also be saved for programming several units. Thus minimizing work and ensuring that all radios harmonize with each other.*

**COMMUNICATION DANS LES ZONES EX**

Le Radio-transmetteur MasterEX 76897 répond aux normes les plus récentes et est utilisable, conformément aux directives ATEX, avec un niveau de protection Ex II 2G Ex ib IIC T4 Gb, dans les zones 1 et 2.

Cet appareil de radiocommunication professionnel fonctionne sur bande de fréquence UHF 400-470 MHz. La puissance d'émission de ce portatif radio est limitée à 1 watt, vous permettant ainsi de travailler en toute sécurité en zones explosibles et d'établir des connexions radio également sur de longues distances.

Le MasterEX 76897 répond en outre à l'indice de protection IP68 et satisfait ainsi aux exigences industrielles élevées en termes de robustesse et de fiabilité, particulièrement en zones explosibles.

Le MasterEx 76897 utilise des technologies analogiques et numériques DRM pour assurer la compatibilité avec les systèmes radio analogiques existants et tirer parti des avantages des communications numériques.

Le MasterEx 76897 prend en charge le mode numérique Travailleur solitaire, Travailleur à terre et Bouton d'urgence avec interruption d'appel comme fonctions programmables. Ces trois niveaux de sécurité assurent le déclenchement d'une alarme, même si le canal est déjà occupé.

Tous les paramètres des fonctions du MasterEX 76897 se règlent confortablement sur PC à l'aide du kit logiciel et peuvent être mémorisés pour la programmation d'autres appareils. Cela vous permet de gagner du temps et de vous assurer que tous les portatifs fonctionnent à l'unisson.

■ MASTEREX 79784

MasterEx 79784 es un medidor magnético tamaño lápiz, diseñado para detectar campos magnéticos en áreas peligrosas. En pocos segundos es capaz de detectar cualquier solenoide que esté eléctricamente activada.

No es necesario una conexión al circuito eléctrico o abrir una caja de terminales.

La alta sensibilidad del punto del tester de MasterEx 79784 provoca que sólo con acercarse a la bobina del solenoide, si ésta muestra una luz roja, indica que el campo magnético está activado. De la misma manera esta prueba se puede efectuar cerca sobre fluxómetros u otros equipamientos que trabajen magnéticamente, incluso cuando estén localizadas en áreas peligrosas.

El MasterEx 79784 viene integrado con un imán de seguridad para que no pueda ser perdido con facilidad. Usando este imán, la prueba se puede efectuar para conocer el estado de trabajo de la unidad y de las baterías.

Después de cualquier chequeo el MasterEx 79784 se apagará automáticamente si no es utilizado durante un tiempo. Esto asegura una larga vida de las baterías.

El clip incluido en un lado del aparato lo asegura por si hay pérdidas accidentales y permite al ingeniero llevarlo todo el tiempo con facilidad.

MasterEx 79784 is a pen-sized magnet probe, designed to detect magnetic fields in hazardous areas. Within seconds it is possible to detect whether or not a solenoid valve is electrically activated.

Connection to electronic circuitry or opening of terminal boxes is rendered unnecessary.

The highly sensitive probe point of the MasterEx 79784 only needs to be brought near the coil of a solenoid valve, if the probe shows a red light this indicates that the magnet is activated. In the same manner tests can be carried out on flowmeters or any other equipment that is working magnetically, even when located in hazardous areas.

The MasterEx 79784 comes with an integral test magnet that is securely fit in such a way that it cannot be easily lost. Using this magnet, tests can be carried out to establish the working state of both unit and batteries.

After any check the MasterEx 79784 will automatically switch off if it is no longer being used. This ensures a long battery life.

The clip attached to the instrument's side secures it from accidental loss and allows the maintenance engineer to easily carry it at all times.

MasterEx 79784 est un mesureur de magnétisme de la grandeur d'un stylo, dessiné pour détecter des champs magnétiques dans des zones dangereuses. En peu de secondes il est capable de détecter quelconque solénoïde qui est activé électriquement.

Il n'y a pas besoin de connexion au circuit électrique ou d'ouvrir le coffret de terminaux.

La grande sensibilité de la pointe du testeur MasterEx 79784 permet de détecter à l'approche de la bobine du solénoïde, par l'allumage d'une lumière rouge, que le champ magnétique est activé. De la même manière ce test peut s'effectuer près d'un fluxomètre ou d'autres équipements qui travaillent magnétiquement y compris quand ils sont dans des zones dangereuses.

El MasterEx 79784 est fourni avec un aimant de sécurité intégré pour qu'il ne se perde pas facilement. En utilisant cet aimant, le test peut s'effectuer pour connaître l'état de travail de l'unité et des batteries.

Après tout contrôle le MasterEx 79784 s'éteindra automatiquement s'il n'est pas utilisé durant un certain temps. Cela assure une meilleure durée de vie aux piles.

Le clip du côté de l'appareil est une sécurité contre la perte et permet à l'utilisateur de le porter facilement.

■ MASTEREX 79502

**Beneficios de la medición sin contacto**

Aumenta la seguridad cuando se determina la temperatura a objetos en movimiento o sin antenas. Significa que el calor por fricción no afecta a la medición. No deja marcas ni imperfecciones al ser el objeto medido.

**Tiempo de respuesta**

Rápida y exacta. La respuesta pirométrica que emite energía es de 20 a 1000 veces más rápida que los termómetros tradicionales de contacto directo.

**Para mediciones de temperatura sin contacto y monitorización de temperatura en áreas peligrosas**

- Gran exactitud
- Operaciones simples
- Rápida respuesta
- Señalización del objeto por láser
- Medida en la Zona 1 y 2

**Datos Ex:**

**Designación Ex:**

Ⓢ II 2 G Ex ia op is IIC T4 0°C < Ta < 50°C

**EC-Certificado de continuidad:**

EPS 10 ATEX 1 242X

**Bajo mantenimiento y no agresivo**

- El procedimiento no afecta a la temperatura del objeto que está siendo medido.
- El hecho de que no haya contacto del detector significa que no hay riesgo por contacto.
- No es necesario fijar o sujetar puntos sobre el objeto o el equipo.

**Para alcanzar objetivos difíciles y objetos en movimiento**

- La óptica del pirómetro se dirige al objeto que va a medir y con la señal de láser es posible apuntar objetos pequeños y distantes.
- Los materiales peligrosos y agresivos pueden ser medidos con seguridad sin miedo a dañar el equipo. El tamaño compacto del pirómetro permite que se pueda usar incluso en posiciones de mucha dificultad, sólo es necesario que exista una línea clara desde la señal al objetivo. Con la medición por contacto directo la capacidad de calor o la conducción de calor del objeto puede transferir un escaso flujo de calor al aparato de medida.

**The benefits of non-contact measurement**

Increased safety when determining the temperature of fast moving objects. No antennas mean that frictional heat cannot affect the measurement. No mark or blemish is left on the object being measured.

**Response time**

Fast and accurate. Pyrometers respond to emitted energy and are around 20 to 1000 times quicker than traditional direct contact thermometers.

**For non-contact temperature measurement and monitoring of temperature processes in Ex-hazardous areas**

- High accuracy
- Simple operation
- Quick response time
- Laser target sighting
- Measure in Zone 1 and 2

**Ex-data:**

**Ex designation:**

Ⓢ II 2 G Ex ia op is IIC T4 0°C < Ta < 50°C

**EC-Certificate of Conformity:**

EPS 10 ATEX 1 242X

**Low maintenance and non invasive**

- The temperature of the object being measured is not affected by the procedure.
- Non contact of the detector means no wear and tear.
- No fixing or fastening points required on either the object or equipment.

**Hard to reach objects and moving materials**

- The optics of the pyrometer are aimed at the object to be measured and with the laser sighting it is possible for both small and distant objects to be targeted.
- Hazardous and aggressive materials can be safely measured - and without fear of damaging the equipment. The compact size of the pyrometer allows it to be used in even the most awkward positions, with only a clear line of sight to the target area being required. With direct contact measurement, poor heat conduction or heat capacity of the object can prevent insufficient heat flow to a measuring device.

**Les bénéfices d'un appareil de mesure à distance**

Il augmente la sécurité lors de la mesure d'objets mobiles. Les antennes n'empêchent pas la prise de température. Pas de marque, ni de défaut ne peuvent gêner la mesure.

**Temps de réponse**

Rapide et précise. Les pyromètres répondent à l'énergie dégagée et sont plus rapides entre 20 à 1000 fois que les traditionnels thermomètres de contact.

**Pour une mesure de température à distance en évitant le contact avec l'appareil de test dans les zones à risques**

- Grande exactitude
- Simple d'utilisation
- Réponse rapide
- Pointage de la cible par laser
- Mesure en zone 1 et 2

**Renseignements Ex:**

**Ex designation:**

Ⓢ II 2 G Ex ia op is IIC T4 0°C < Ta < 50°C

**EC-Certificat de conformité:**

EPS 10 ATEX 1 242X

**Petit entretien et sans intervention**

- La température de l'objet étant mesurée elle n'est pas affectée.
- L'absence de contact fait éviter l'usure et les accrocs.
- Aucune fixation n'est nécessaire pour chacun des objets ou équipements.

**Difficulté d'atteindre des objets ou des matériaux en mouvement**

- Les optiques du pyromètre pointent l'objet à mesurer et avec la vise laser il est possible de pointer des objets petits et distants.
- Des matériaux à risque peuvent être mesurés en sécurité sans dommage pour l'équipement. La forme compacte du pyromètre lui permet une utilisation dans les positions les plus inconfortables avec une visée claire. Avec une mesure par contact, la faible chaleur de conduction ou de potentiel de l'objet peuvent empêcher une bonne mesure.

■ MASTEREX 79360 & 77780

Los focos LED MasterEx 79360 y 77780 están especialmente diseñados para la iluminación de grandes espacios en zonas Ex. Las dos posiciones de intensidad del LED (50% y 100%) permiten adaptar la intensidad de la luz emitida. Los focos son aptos para su uso en zonas 1 y 21.

El cuerpo permite una rotación de 180° facilitando la orientación del haz luminoso.

El cable de 10 m facilita el movimiento del foco desde la toma de corriente hasta la zona de trabajo.

Su carcasa de fundición de aluminio le confiere una gran resistencia y protección, asegurando su funcionamiento incluso en las condiciones de uso más extremas.

Además el asa en la carcasa permite un transporte del foco cómodo y seguro.

El foco LED MasterEx 77780 está especialmente indicado para los ambientes explosivos en los que se necesita una potente iluminación pero se carece de una toma eléctrica cercana.

Su batería de litio ofrece una autonomía de hasta 4 horas con una sola carga.

*The MasterEx 79360 and 77780 hand lamps are specially designed to (illuminate) light large spaces in hazardous areas. The two LED modes (50% and 100% output) allow to adapt the intensity of the emitted light. The lamps are suitable for use in zones 1 and 21.*

*It is possible to rotate the body 180° in order to guide the light beam.*

*The 10 m length cable facilitates the movement of the hand lamp from the electric supply to the working area.*

*Its die casted aluminum housing grants it a huge resistance and protection, assuring the correct functioning even in the hardest conditions.*

*The handle on the housing allows the transport of the lamp in an easy and safer way.*

*The MasterEx 77780 is specially indicated for the hazardous areas in which is necessary a powerful illumination but there is no electric supply. Its lithium battery assures 4 h of usage with one charge.*

Les projecteurs LED MasterEx 79360 & 77780 ont été spécialement conçus pour l'éclairage des grands espaces en zones Ex. Les deux positions du LED (50% et 100%) permettent d'adapter l'intensité de la lumière qui en jaillit. Les projecteurs sont adaptés pour un usage en zones 1 et 21.

Le corps permet une rotation de 180°, ce qui facilite l'orientation du projecteur lumineux.

Le câble de 10m facilite le maniement de la lampe, de la prise de courant jusqu'à la zone de travail.

Le boîtier en fonte d'aluminium permet une meilleure résistance et protection, qui assure son fonctionnement optimal dans les conditions d'utilisation plus extrêmes.

De plus, la poignée permet un maniement plus sûr et confortable.

Le projecteur LED MasterEx 77780 est spécialement adapté pour les environnements explosifs dans lesquels il y a besoin d'un éclairage puissant mais sans prise électrique proche. Sa batterie lithium offre une autonomie allant jusqu'à 4 heures, avec une seule charge.

La linterna LED MasterEx 79731 resulta idónea para iluminar zonas de trabajo en ambientes explosivos peligrosos. Su batería de litio proporciona una autonomía de hasta 6 h, y está diseñada específicamente para resistir las condiciones industriales de trabajo diario. Resulta una opción ideal para su uso en ambientes explosivos peligrosos.

Sus dos focos LED permiten una iluminación adecuada en todas las condiciones de utilización. El LED frontal tiene dos modos de intensidad, proporcionando de 150 a 300 lumens. El LED superior emite un haz de luz de 100 lumens.

Ya sea fijada mediante la base magnética o colgada a través de su gancho de 360°, su diseño permite el posicionamiento adecuado para iluminar las zonas de trabajo sin necesidad de sujetarla manualmente. El clip trasero permite al usuario su cómodo transporte.

El indicador de carga en la parte trasera informa del estado de la batería.

Su carcasa de plástico antiestático le confiere un alto grado de protección mientras que facilita un agarre seguro y comfortable.

*The MasterEx 79731 inspection lamp is the ideal solution for illuminating working zones in hazardous areas. Its lithium battery provides a 6 h usage and it is specially designed to stand the daily industrial working conditions. It is the best solution for the hazardous areas.*

*Its two LED lights allow a proper illumination for all the working conditions. The front LED has two output modes, providing 150 to 300 lumen. The top LED gives a 100 lumen beam.*

*Its design allows proper positioning to illuminate working areas with no need to hold it manually by its magnetic holder or the 360° hanging hook. The clip in the rear allows an easy transport.*

*The charge indicator in the back side of the lamp provides information about the charge status.*

*Its antistatic plastic housing grants a high protection grade as well as permits the handling of the lamp.*

La lampe LED MasterEx 79731 est idéale pour éclairer les zones de travail en environnements explosifs et dangereux. Sa batterie lithium offre jusqu'à 6 heures d'autonomie, et a été conçue pour résister aux conditions industrielles de travail au quotidien. C'est le matériel idéal pour une utilisation en environnements explosifs et dangereux.

Ses deux projecteurs LED permettent un éclairage optimal quelque soient les conditions d'utilisation. Le LED frontal est configuré à deux modes d'intensité allant de 150 à 300 lumens. Le LED supérieur émet un projecteur lumineux de 100 lumens.

Qu'elle soit fixée sur une base magnétique ou suspendue à un crochet de 360°, son élaboration permet un positionnement optimal pour éclairer las zones de travail sans avoir besoin de la porter à la main. Le clip au dos permet à l'utilisateur de la transporter sans gêne.

L'indicateur de charge au dos indique l'état de la batterie.

Son boîtier en plastique antistatique lui confère un niveau de protection élevé, ainsi qu'une facilité de transport plus sûre et comfortable.

■ ACCESORIOS INCLUIDOS: / INCLUDED ACCESSORIES: / ACCESSOIRES INCLUS:

Base de carga

- Medidas: 110x100x90 mm
- Peso: 125 g
- Posibilidad de anclaje a la pared

Cable de carga

- Longitud: 1 m
- Peso: 25 g

Cargador

- Alimentación: 100-240 V 50/60 Hz con enchufe europeo
- Peso: 45 g

Charging station

- Measures: 110x100x90 mm
- Weight: 125 g
- Suitable for wall mounting

Charging cable

- Length: 1 m
- Weight: 25 g

Charger

- Power supply: 100-240 V 50/60 Hz with european plug
- Weight: 45 g

Base de charge

- Mesures: 110x100x90 mm
- Poids: 125 g
- Possibilité d'ancrage dans le mur

Câble de charge

- Longueur: 1 m
- Poids: 25 g

Chargeur

- Alimentation: 100-240 V 50/60 Hz avec prise européenne
- Poids: 45 g

■ MASTEREX 79639 & 79640

La linterna MasterEx 79639-79640 está equipada con un led de alta potencia y un sensor de luz para ahorrar energía. Perfecta para uso en ambientes explosivos peligrosos, hasta zona 0 y 20, conjugando resistencia y potente iluminación. Adaptable a cascos de bombero.

*The MasterEx 79639-79640 is equipped with a high power led and a light sensor for saving energy. Ideal torch for hazardous areas, up to Zone 0 and 20, combining heavy-duty performance and powerful illumination. It can be mounted in fire helmets.*

La lanterne MasterEX 79639-79640 est dotée d'un led de grande puissance et d'un capteur de lumière pour économiser de l'énergie. Parfaite pour une utilisation en atmosphères explosives dangereuses, jusqu'à la zone 0 et 20, conjuguant résistance et forte luminosité. Adaptable aux casques de pompiers.

■ MASTEREX 79641

La linterna MasterEx 79641 está equipada con un led blanco de potencia de 3W y uno rojo de alta intensidad que emite un destello papadeante y orientable. Perfecta para uso en ambientes explosivos peligrosos, hasta zona 0 y 20, conjugando resistencia y potente iluminación. Fabricada en resina termoplástica de alta resistencia a los impactos, las temperaturas extremas, los líquidos y sustancias corrosivas.

*The MasterEx 79641 is equipped with a 3W white power led and one red high intensity led which emits flashing and guides. Ideal torch for hazardous areas, up to Zone 0 and 20, combining heavy-duty performance and powerful illumination. Made of thermoplastic resin of high resistance to shocks, extreme temperatures, liquids and corrosive substances.*

La lanterne MasterEx 79641 est dotée d'un led blanc de 3 W. et d'un rouge de grande intensité qui produit un scintillement clignotant et orientable. Parfaite pour une utilisation en atmosphères explosives, en zones 0 et 20, conjugant résistance et luminosité intense. Fabriquée en résine thermoplastique de grande résistance aux chocs, aux températures extrêmes, aux liquides et substances corrosives.

■ MASTEREX 79595

La linterna FOCUS LED MasterEx 79595 ofrece una autonomía de 32 horas con sus 4 pilas alcalinas AA, aportando 79 lúmenes de iluminación. Su potente FOCUS LED la convierte en una linterna perfecta para uso en los ambientes de gas/polvo explosivos más peligrosos, hasta Zona 0/20, cuando se requiere de gran potencia de alumbrado, y flexibilidad, gracias a su mango acodado.

*The MasterEx 79595 FOCUS LED torch provides 32 hours of continuous work with 4 AA alkaline batteries, projecting an illumination of 79 lumens. Its powerful FOCUS LED makes it the ideal torch for the most hazardous gas/dust areas, up to Zone 0/20, when high illumination is required. Its offset handle also provides great flexibility.*

La lampe FOCUS LED MasterEx 79595 offre une autonomie de 32 heures avec ses 4 piles alcalines AA, en fournissant 79 lumens d'illumination. Son puissant FOCUS LED la transforme en lampe parfaite pour utiliser dans les environnements de gaz gaz/poussière explosifs les plus dangereux, jusqu'à la Zone 0/20, quand c'est nécessaire d'obtenir une grande puissance d'éclairage et flexibilité grâce à son manche coudé.

■ MASTEREX 79789

La cámara digital intrínsecamente segura MasterEx 79789 es la herramienta de visualización perfecta para áreas con peligro de explosión. Con certificación ATEX e IECEx, la MasterEx 79789 puede usarse en todos los sectores, como por ejemplo en plantas químicas y farmacéuticas, plataformas de producción de petróleo y gas, refinerías, minería y servicios de emergencia, entre otros.

Fabricada en plástico antiestático reforzado, la MasterEx 79789 está clasificada como IP65, con lo cual puede emplearse en los ambientes más duros. Gracias a su carcasa fina y alargada, su peso no supera los 200 g, lo que la convierte en la herramienta perfecta para el transporte de bolsillo.

Equipada con un flash 4 LEDs de alto brillo, tecnología antivibraciones y una resolución de 3,1 megapixels, la MasterEx 79789 ofrece imágenes de alta calidad en ambientes con alto peligro de explosión, y de forma segura.

La transferencia de datos a cualquier ordenador en un área segura es simple y fácil de llevar a cabo vía puerto USB empleando el PTP (protocolo de transferencia de fotos), que se inicia automáticamente.

La hora y la fecha se imprimen automáticamente en todas las fotografías para crear una historia cronológica, uniéndose automáticamente la función Anotación Verbal de Audio al nombre del archivo.

*The MasterEx 79789 intrinsically safe digital camera is the perfect visualisation tool for use in hazardous areas. ATEX and IECEx certified, MasterEx 79789 can be used in all sectors of industry including Chemical & Pharmaceutical plants, Oil & Gas production platforms, Refineries, Mining and Emergency Services to name but a few.*

*Made of rugged injection moulded anti-static plastic, MasterEx 79789 is IP65 rated and is suitable for use in the most arduous environments. Due to its long slim lightweight enclosure weighing less than 200 g, MasterEx 79789 lends itself to single handed operation, making it convenient to carry in your pocket.*

*Equipped with its super bright 4 LED flash, anti-shake technology and 3.1 mega pixel resolution, MasterEx 79789 provides high quality images in all Hazardous Area environments.*

*Data transfer to any computer in the safe area is simple and easy to undertake via a USB port utilising Picture Transfer Protocol (PTP) which is initiated automatically.*

*All images are date and time stamped to create a chronological history and are coupled to the unique function of Voice Annotation Audio records, which are systematically matched to the image file name.*

La cámara digital intrínsecamente segura MasterEx 79789 es la herramienta de visualización perfecta para áreas con peligro de explosión. Con certificación ATEX e IECEx, la MasterEx 79789 puede usarse en todos los sectores, como por ejemplo : les usines chimiques et pharmaceutiques, plates-formes de production de pétrole et gaz, raffineries, minière et services d'urgences, entre autres.

Fabricada en plástico antiestático reforzado, la MasterEx 79789 está clasificada como IP65, para esta razón ella puede ser utilizada en los entornos más críticos. Con su carcasa fina y alargada, su peso no supera los 200 g, lo que le permite ser considerada un herramienta perfecta y fácil de guardar en el bolsillo.

Equipada con un flash de 4 diodos de alta brillantez, tecnología anti-vibraciones y una resolución de 3,1 megapixels, la MasterEx 79789 ofrece de forma segura imágenes de alta calidad en los entornos con alto riesgo de explosión.

El transferir de datos a cualquier ordenador es simple y fácil de hacer a través del puerto USB utilizando el PTP (protocolo de transferencia de fotos) que se inicia automáticamente.

La hora y la fecha se imprimen automáticamente en todas las fotos para crear una historia cronológica, todo añadiendo la función Anotación Verbal de Sonido al nombre del archivo.

## TALADROS / DRILLS / PERCEUSES / KLEINBOHRMASCHINE / TRAPANI / BERBEQUINS / ДРЕЛИ

Los taladros ATEX de EGA Master son robustos, potentes y muy manejables. El usuario dispone de diferentes modelos para poder escoger el que más se adapte a sus necesidades.

El taladro percutor de EGA Master está pensado para realizar taladros y perforaciones en multitud de materiales. La gran diferencia frente a un taladro normal, es la posibilidad de seleccionar un movimiento de percusión que acompañe al de rotación, facilitando enormemente la capacidad de perforación. Es imprescindible para perforar espesores muy gruesos de material de obra determinados o materiales muy duros, como el hormigón, la piedra, etc.

*EGA Master's ATEX drills are solid, powerful and very manageable. The user can choose different models that best suit his needs.*

*EGA Master Hammer drill is designed for drilling holes in several types of materials. The great difference from an ordinary drill, is the possibility of selecting a percussive movement that accompanies the rotation, greatly facilitating the drilling performance. This drill is essential to bore very thick or very hard materials such as concrete, stone, etc.*

Les perceuses ATEX d'EGA Master sont robustes, puissantes et très maniables. L'utilisateur dispose de différents modèles pour pouvoir choisir celui qui s'adapte le mieux à ses besoins.

La perceuse à percussion d'EGA Master a été conçue pour réaliser des perçages dans des multitudes de matériaux. La grande différence face à une perceuse normale, est la possibilité de sélectionner un mouvement de percussion qui accompagne celui de rotation, facilitant énormément la capacité de perforation. Elle est indispensable pour percer de grosses épaisseurs de matériau de travail ou des matériaux très durs, comme le béton, la pierre, etc.

## ■ LLAVES DE IMPACTO / IMPACT WRENCHES / CLÉS À CHOC / SCHLAGSCHRAUBER / AVVITATORI AD IMPULSI / CHAVES DE IMPACTO / УДАРНЫЕ ГАЙКОВЕРТЫ

Las llaves de impacto se utilizan para aplicar altos pares a tornillos de todo tipo con el simple accionamiento de un gatillo. De esta manera, podremos apretar y aflojar tornillos (por muy oxidados que éstos estén) que a mano nos sería imposible. Es muy importante tener en cuenta la medida de los tornillos con los que se va a trabajar porque no todos aguantaran el par máximo que estas llaves son capaces de aplicar.

Impact wrenches are used to apply high torque to nuts of all kinds. Thus, we can tighten and loosen the nuts (even very oxidized ones) that would be impossible to do by hand. It is very important to consider which nuts we will work on, because not all of them will stand the maximum torque that these wrenches are able to apply.

Les clés à choc s'utilisent pour appliquer un serrage important de tout type de boulons, en actionnant tout simplement une gâchette. De cette façon, il est possible de serrer ou de desserrer des écrous (même très oxydés) qui serait impossible manuellement. Il est important de prendre en compte le diamètre des écrous à travailler car tous ne pourront pas supporter le couple maximum que ces clés sont capables d'appliquer.

Las llaves dinamométricas ATEX de EGA Master también llamadas llaves de torsión, son herramientas que se utilizan para ajustar el par de apriete de elementos roscados. Disponen de un mecanismo, que hace que una vez alcanzado el par deseado, la llave no transmita más par al elemento que estamos apretando.

The EGA Master ATEX torque wrenches are used to adjust the torque of threaded elements. They have a mechanism which avoids transferring extra torque after reaching the desired torque value.

Les clés dynamométriques ATEX d'EGA Master, également appelées clés de torsion, sont des outils qui s'utilisent pour ajuster le couple de serrage d'éléments filetés. Elles sont dotées d'un système automatique de désenclenchement de serrage une fois atteint le couple sélectionné.

## ■ SIERRAS / SAWS / SCIES / SÄGEN / SEGNETTO / SERRAS / ПИЛЫ

Las sierras de cinta o de banda de EGA Master, tiene una hoja metálica dentada, larga, estrecha y flexible que se desplaza sobre dos ruedas que se encuentran en el mismo plano vertical. Sus aplicaciones son muy variadas: construcción, corte de tuberías, refinerías... y son capaces de cortar: plástico, madera, acero, INOX...

Las sierras portátiles son herramientas necesarias para poder realizar todo tipo de cortes; cortes cruzados, rectos, cortes curvos, cortes en pico, biselados, etc...

*EGA Master band saw has a long, narrow and flexible toothed metal saw blade that moves on two wheels which are in the same vertical plane. Its applications are varied: construction, pipe cutting, refineries... Besides, they are capable of cutting: plastic, wood, steel, stainless steel...*

*Portable saws are necessary to perform all type of cutting, cross, straight, curved, cuts in peak, beveled, etc...*

Les scies à ruban ou à bande d'EGA Master, a une bande métallique dentée, étroite et flexible qui se déplace sur deux roues se trouvant au même niveau verticalement. Ses applications sont diverses: construction, coupure de tuyauterie et raffinerie... et sont capables de couper du plastique, du bois, de l'acier, de l'INOX...

Les scies portables sont des outils nécessaires afin de réaliser tous types de coupures : croisées, droites, courbées, en pic, biseautées, etc...

CORTA-TUBOS BISELADOR / РЕЗАК-ФАСКОШИМАТЕЛЬ**

El cortatubos biselador MasterEX 79760, es una potente máquina hidráulica ideal para cortar y achaflanar tubos de los más diversos materiales como acero, fundición dúctil, hormigón plástico (OE, PVC, GRP)...

Especialmente diseñado para trabajos en zonas con ambiente explosivo.

*The MasterEX 79760 is a powerful hydraulic pipe cutting machine ideal for cutting and bevelling of most different materials, as steel, ductile iron, concrete, cement, clay, plastics (PE, PVC, GRP)...*

*Machine especially designed for safety works in explosive areas.*

Le coupe-tube biseauté MasterEX 79760 est une puissante machine hydraulique idéale pour couper et chanfreiner des tubes des matériaux les plus divers tels que l'acier, la fonte ductile, le béton plastique (OE, PVC, GRP) ...

Spécialement conçu pour des travaux dans des zones à atmosphère explosive.

En los ventiladores axiales o helicoidales de EGA Master el aire circula en la misma dirección que su eje. Son capaces de mover grandes cantidades de aire por lo que son muy adecuados para la ventilación y la extracción de humos y gases.

EGA Master axial or helical fans circulate the air in the same direction of its axis. These fans are capable of moving large quantities of air thus they are very suitable for ventilation and smoke and gas extraction.

Dans les ventilateurs axiaux ou hélicoidaux d'EGA Master, l'air circule dans la même direction que son axe. Ils sont capables de déplacer une grande quantité d'air, ce qui justifie leurs aptitudes pour la ventilation et l'extraction de fumées et gaz.

La bomba hidráulica ATEX EGA Master 76757 no sólo aporta las mejores prestaciones en cuanto a presión y caudal para un trabajo rápido y ergonómico, sino que asegura el cumplimiento de las medidas de seguridad exigidas por la Directiva 2014/34/UE para ambientes explosivos.

The EGA Master ATEX hydraulic power unit pump 76757, not only provides the best features in terms of pressure and flow for a quick an ergonomic work, but also ensures the fulfilment of the safety measures required by 2014/34/UE Directive for explosive environments.

La pompe hydraulique ATEX EGA Master 76757 non seulement proportionne les meilleures performances en termes de pression et de débit pour un travail rapide et ergonomique, mais elle assure également l'accomplissement des mesures de sécurité requises par la directive 2014/34/UE pour les environnements explosifs.

# AQUA Master

**EGA Master** ha lanzado una completísima gama de herramientas neumáticas e hidráulicas para usos subacuáticos; amoladoras, llaves de impacto, taladros, sierras... Todas ellas están diseñadas para profesionales cuyo ámbito de trabajo habitual esté situado bajo el agua: embarcaciones hundidas, estructuras sumergidas, plataformas petrolíferas, centrales hidráulicas... Gracias a su diseño constructivo son aptas para su uso a cualquier profundidad accesible para los submarinistas.

*EGA Master has launched a very complete range of pneumatic and hydraulic tools for underwater applications; grinders, impact wrenches, drills, saws (etc.). All of them are specially designed for professionals who usually work in underwater environment: sunk boats, submerged structures, oil rigs, hydro electric power station (etc.). Because of their design, they are suitable for being used at all depths accessible to divers.*

**EGA Master** a lancéé une complète gamme d'outillage pneumatique et hydraulique pour utilisations subaquatiques; affilage, clés à frapper, perceuses, scies... Elle est conçue pour des professionnels dont le cadre de travail habituel est situé sous l'eau: embarcations coulées, structures submergées, plates-formes pétrolières et centrales hydrauliques... Grâce à son dessin constructif, elle est apte pour une utilisation dans n'importe quelle profondeur accessible pour les sous-marins.

## Instrucciones de manejo para las herramientas subacuáticas Operating instructions for underwater tools Mode d'emploi des outils subaquatiques

### Antes de la operación subacuática:

- Comprobar que la máquina no tiene fugas.
- Comprobar todas las funciones de la máquina.
- Rociar todas las piezas móviles con el lubricante OKS 8601 (o similar).

### Después de la operación subacuática:

- Limpiar la máquina.
- Secar la máquina con aire comprimido.
- Rociar todas las piezas móviles con el lubricante OKS 8601 (o similar).

### Before underwater operation:

- Test the machine for leakage.
- Test all functions of the machine.
- Spray all moving parts with lubricant OKS 8601 (or similar).

### After underwater operation:

- Clean the machine.
- Dry the machine with compressed air.
- Spray all moving parts with lubricant OKS 8601 (or similar).

### Avant l'opération subaquatique:

- Vérifier que la machine n'a pas de fuites.
- Vérifier toutes les fonctions de la machine.
- Asperger toutes les parties mobiles avec le lubrifiant OKS 8601 (ou équivalent).

### Après l'opération subaquatique:

- Nettoyer la machine.
- Sécher la machine avec de l'air comprimé.
- Asperger toutes les pièces mobiles avec le lubrifiant OKS 8601 (ou équivalent).

### ■ AMOLADORAS / GRINDERS / MEULEUSES / SCHLEIFMASCHINEN / SMERIGLIATRICI / REBARBADORAS / УГЛОВЫЕ ШЛИФОВАЛЬНЫЕ МАШИНКИ

Las amoladoras son herramientas muy versátiles, utilizadas en el sector del metal y la construcción para trabajar con diferentes materiales (acero, hormigón, piedra, madera, ...). Dependiendo de la herramienta de inserción escogida, podremos realizar diversos trabajos como por ejemplo; pulir, lijar, rebarbar, tronzar, devastar...

Grinders are very versatile tools, used in metal industry and construction, to work with different materials (steel, concrete, stone, wood, ...). Different insertion tools, can do different jobs such as, grinding, sanding, deburring and cutting.

Les meuleuses sont des outils versatils, utilisés dans le secteur métallier et la construction pour différents matériaux (acier, béton, bois, pierre, ...). Suivant le disque choisi, nous pourrions polir, lisser, raboter, couper, dévaster...

## AQUA Master

### ■ LLAVES DE IMPACTO / IMPACT WRENCHES / CLÉS À CHOC / SCHLAGSCHRAUBER / AVVITATORI AD IMPULSI / CHAVES DE IMPACTO / УДАРНЫЕ ГАЙКОВЕРТЫ

Las llaves de impacto se utilizan para aplicar altos pares a tornillos de todo tipo con el simple accionamiento de un gatillo. De esta manera, podremos apretar y aflojar tornillos (por muy oxidados que éstos estén) que a mano nos sería imposible. Es muy importante tener en cuenta la medida de los tornillos con los que se va a trabajar porque no todos aguantarán el par máximo que estas llaves son capaces de aplicar.

Impact wrenches are used to apply high torque to nuts of all kinds. Thus, we can tighten and loosen the nuts (even very oxidized ones) that would be impossible to do by hand. It is very important to consider which nuts we will work on, because not all of them will stand the maximum torque that these wrenches are able to apply.

Les clés à choc s'utilisent pour appliquer un serrage important de tout type de boulons, en actionnant tout simplement une gâchette. De cette façon, il est possible de serrer ou de desserrer des écrous (même très oxydés) qui serait impossible manuellement. Il est important de prendre en compte le diamètre des écrous à travailler car tous ne pourront pas supporter le couple maximum que ces clés sont capables d'appliquer.

## AQUAMaster

### ■ TALADROS / DRILLS / PERCEUSES / KLEINBOHRMASCHINE / TRAPANI / BERBEQUINS / ДРЕЛИ

Los taladros de uso subacuático de EGA Master son robustos, potentes y muy manejables. El usuario dispone de diferentes modelos para poder escoger el que más se adapte a sus necesidades. El taladro percutor de EGA Master está pensado para realizar taladros y perforaciones en multitud de materiales. La gran diferencia frente a un taladro normal, es la posibilidad de seleccionar un movimiento de percusión que acompañe al de rotación, facilitando enormemente la capacidad de perforación. Es imprescindible para perforar espesores muy gruesos de material de obra determinados o materiales muy duros, como el hormigón, la piedra, etc.

EGA Master's drills for underwater use are solid, powerful and very manageable. The user can choose different models that best suit his your needs. EGA Master Hammer drill is designed for drilling holes in several types of materials. The great difference from an ordinary drill, is the possibility of selecting a percussive movement that accompanies the rotation, greatly facilitating the drilling performance. This drill is essential to bore very thick or very hard materials such as concrete, stone, etc.

Les perceuses subaquatiques d'EGA Master sont robustes, puissantes et très maniables. L'utilisateur dispose de différents modèles pour pouvoir choisir celui qui s'adapte le mieux à ses besoins. La perceuse à percussion d'EGA Master a été conçue pour réaliser des perçages dans des multitudes de matériaux. La grande différence face à une perceuse normale, est la possibilité de sélectionner un mouvement de percussion qui accompagne celui de rotation, facilitant énormément la capacité de perforation. Elle est indispensable pour percer de grosses épaisseurs de matériau de travail ou des matériaux très durs, comme le béton, la pierre, etc.

### SIERRAS PORTÁTILES / RECIPROCATING SAWS / SCIES PORTABLES / STICHSÄGE / SEGNETTI PORTATILI / SERRAS PORTÁTEIS / ПИЛЫ ВОЗВРАТНО-ПОСТУПАТЕЛЬНОГО ДЕЙСТВИЯ

Las sierras portátiles son herramientas necesarias para poder realizar todo tipo de cortes; cortes cruzados, rectos, cortes curvos, cortes en pico, biselados, etc. Destacan las sierras sable también conocidas como sierras de vaivén, que como bien dice su nombre, aprovechan el movimiento de vaivén de su cuchilla para facilitar la realización de cortes.

Reciprocating saws are necessary tools to perform all types of cutting: cross cut, straight, curved cuts, cuts in peak, beveled, etc.. It is worth highlighting saber saws also known as jigsaws, which use the swinging motion of its blade to make cuts easier.

Les scies portables sont adaptées pour des coupes; coupes croisées, droites, courbes, biseautées, etc... Il y a aussi les scies sabres, avec un mouvement de va et vient, pour faciliter la coupe.

## AQUAMaster

### ■ LINTERNA / TORCH / LAMPE / TASCHENLAMP / TORCIA / LANTERNA / ФОНАРЬ

#### ■ MASTEREX 79598

La Linterna MasterEx 79598 ofrece una autonomía de 13 horas con sus 4 pilas alcalinas AA y está equipada con un LED de potencia 1W.

Su ligereza, ergonomía y su grado de protección IP68 la convierten en una linterna perfecta para su uso tanto en ambientes de gas explosivos peligrosos, hasta zona 0, como para uso subacuático.

*The MasterEx 79598 LED torch offers 13 hours of continuous work with 4 AA alkaline batteries and is equipped with a 1W power LED.*

*Its light, ergonomics and IP68 protection grade makes it a perfect torch for use both in hazardous gas areas, up to Zone 0, and for underwater use.*

La lampe LED MasterEx 79598 offre une autonomie de 13 heures avec ses 4 piles alcalines AA et elle est composée par un LED de puissance 1W.

Sa légèreté, ergonomie et degré de protection IP68, la transforment en lampe parfaite pour utiliser dans les environnements de gaz explosifs dangereux, jusqu'à la Zone 0, comme pour utilisation subaquatique.

ANTI-MAGNÉTICO DE TITÂNIO  
НЕМАГНИТНЫЙ ТИТАНОВЫЙ

TITANIO  
TITANIUM  
TITANE

Las herramientas de Titanio EGA Master han sido desarrolladas con la más alta tecnología y fabricadas en aleación de Titanio 6Al-4V, para ser usadas en los más exigentes y avanzados campos, tales como la aviación, equipos hospitalarios, aplicaciones aeroespaciales y militares. Estas propiedades hacen que esta aleación sea la mejor que actualmente existe para aplicaciones críticas y especiales que requieren una gran capacidad mecánica, combinada con características que otra aleación no puede conseguir, como la de ser no-magnética, etc. Muchas aplicaciones requieren herramientas completamente no magnéticas para no causar ninguna alteración, por ejemplo dispositivos muy sensibles usados en laboratorios, hospitales, centros de transformación, estaciones de radar, antenas etc.

*EGA Master Titanium Tools have been developed with the help of the most advanced technology. They are manufactured with Titanium alloy, 6Al-4V, which has been used in the most innovative and advanced fields, such as aviation, military and aerospace applications. Its properties make this alloy the best one among the current existing ones for special and critical applications that require high mechanical properties, combined together with features that no other steel alloy tool can reach, like Non-Magnetism. Many applications require the use of totally non-magnetic tools in order to avoid any magnetic disturbance, such as very sensitive electronic devices used in laboratories, hospitals, power plants, etc.*

L'outillage en Titane d'EGA Master a été développé avec la plus haute technologie, alliage de Titane 6Al-4V, utilisé dans les domaines les plus avancés et les plus techniques comme l'aviation, l'industrie militaire et les applications aérospaciales. Les propriétés du Titane font de cet alliage, le meilleur pour des applications critiques et spéciales qui requièrent une grande résistance mécanique, combinée avec d'autres caractéristiques que d'autres alliages de fer n'ont pas, comme l'amagnétisme. Beaucoup d'applications nécessitent des caractéristiques totalement amagnétiques, pour ne pas causer d'altération magnétique, par exemple, avec des dispositifs très sensibles utilisés dans les laboratoires, les hopitaux et les centres de transformation...

■ **INSTRUCCIONES DE USO Y GARANTÍA**  
**INSTRUCTIONS FOR USE & WARRANTY**  
**INSTRUCTIONS DE GARANTIE ET D'UTILISATION**

- Las herramientas de Titanio no pueden alcanzar la dureza de las herramientas convencionales. Esto es debido al hecho de que la composición del material hace que sea imposible que sea inducida su dureza. Por esta razón, el uso de las herramientas de Titanio debe tener un especial cuidado, evitando sobreesfuerzos.  
*Titanium Tools cannot reach the hardness of conventional tools, due to the fact that the material composition makes it impossible to be induction hardened. For this reason the use of Titanium Tools has to be carried out with special care, avoiding overstraining, heating, etc.*  
L'outillage Titane ne peut pas avoir la même dureté que l'outillage traditionnel, car la composition du matériau empêche l'induction de la dureté. Pour cela, il requière une attention spéciale, en évitant la rupture, la chaleur...
- El uso de herramientas de Titanio no debe ser la única medida preventiva en áreas en las que se ha diseñado para ello. Otros objetos, como ropa o material presencial, deben ser también adecuados.  
*The use of Titanium Tools must not be the only preventive measure in areas which the items are designed for. Other items, clothes or present material must also be adequate.*  
L'utilisation d'outillage en Titane ne doit pas être le seul moyen de prévention dans les environnements pour lequel il est conçu. D'autres objets, comme les vêtements et matériaux présents doivent aussi être adaptés aux applications anti-déflagrantes.
- Las herramientas de Titanio de **EGA Master** tienen una garantía de por vida. En el caso de defecto de fabricación deberán ser reparadas o reemplazadas sin ningún coste. El uso indebido es considerado como una excepción de la garantía.  
*EGA Master Titanium Tools are provided with lifetime warranty. In case an EGA Master tool breaks or fails to perform under normal and correct use, it will be repaired or replaced free of cost. Any misuse, abuse or normal service wear is considered as an exception to the warranty.*  
L'outillage en Titane de **EGA Master** a une garantie à vie. Dans le cas d'une rupture ou en présence de vices à la livraison, l'outillage devra être réparé ou remplacé sans aucun surcoût. Une utilisation non conforme exclut la garantie.

¿Sabía usted que las herramientas de Titanio de **EGA Master** se emplean por el laboratorio CERN (Organización Europea de Investigación Nuclear) que recientemente ha encontrado el Bosón de Higgs, uno de los descubrimientos científicos más importantes de todos los tiempos? Las partículas que colisionan durante los experimentos se aceleran a velocidades cercanas a la luz usando potentísimos electro-imanés. Estos últimos requieren del empleo de herramientas completamente amagnéticas, como las herramientas de Titanio fabricadas por **EGA Master**.

Did you know that **EGA Master** titanium tools are used by the CERN laboratory (European Organization for Nuclear Research) which has recently found the Higgs Boson, one of the greatest scientific discoveries of all times? The particles that collide during the experiments are accelerated to speeds that are close to the speed of light by using very powerful electro-magnets. Such magnets require the use of non-magnetic tools, the most non-magnetic of which are the ones made in Titanium by **EGA Master**.

Saviez vous que les outils en titane d'**EGA Master** sont utilisés par le laboratoire CERN (Organisation Européenne de Recherche Nucléaire) qui a récemment découvert le boson d'Higgs, une des découvertes scientifiques les plus importantes de tous les temps? Les particules que entrent en collision durant les expériences s'accélèrent à des vitesses proches de celle de la lumière en utilisant des électro-aimants très puissants. Ces derniers requièrent l'usage d'outils complètement amagnétiques, tels que les outils en Titane fabriqués par **EGA Master**.

# INOX

Un mundo desarrollándose exponencialmente rápido, genera crecientes necesidades en materia de seguridad y aplicaciones de tecnología avanzada.

**EGA Master** ha desarrollado una nueva gama de herramientas de acero inoxidable para proporcionar soluciones a algunas de estas necesidades. El acero inoxidable 420\* contribuye a evitar contaminaciones, oxidación y cumplimiento de requisitos de sala blanca.

*A world developing exponentially fast, creates increasing needs on safety and technologically advanced applications.*

*EGA Master has developed a new range of stainless steel tools to provide solutions to some of these needs. 420\* stainless steel contributes to avoid contaminations, rusting and complying with clean room environment requirements.*

Le monde en plein développement exponentiel, crée une augmentation des besoins en matière de sécurité et applications de technologie avancées

**EGA Master** a développé une nouvelle gamme d'outillages en acier inoxydable pour apporter des solutions à certains de ces besoins. L'acier inoxydable 420\* contribue à éviter la contamination, l'oxydation en respectant les règles ambiantales des milieux extra sain.

\* Los armarios portaherramientas inox están fabricados en acero inoxidable 430.  
*The stainless steel roller cabinets are made of 430 stainless steel.*  
 Les servantes en inox sont fabriquées en acier inoxydable 430.

Incluso cuando la capa está dañada químicamente o mecánicamente, el oxígeno del medio ambiente reparará la capa de nuevo</p> <p><i>Stainless steel is a low carbon steel enriched with above 10% chromium, which allows the formation of an invisible chromium oxide layer that protects the core from rusting. Even when the layer is damaged chemically or mechanically, the oxygen of the environment will repair the layer again</i></p> <p>L'acier inoxidable est un acier a faible composition en carbone enrichi avec 10% de Chrome qui permet la formation d'une pellicule d'oxide de Chrome invisible qui protège de l'oxidation. Meme quand la pellicule est détérioré par un impact l'oxigène du milieux ambiant repare la pellicule</p> |

Como ocurre con los aceros al carbono, hay docenas de diferentes aceros inoxidable y cada uno de ellos presenta diferentes propiedades para diferentes aplicaciones: algunos son más resistentes a la corrosión, otros son más resistentes a la tracción, otros más duros... Pero ninguno de ellos mejor en todo el conjunto de propiedades.

EGA Master ha elegido el acero inoxidable 420 para la fabricación de sus herramientas, ya que combina de manera óptima las diferentes propiedades requeridas para la fabricación y uso de herramientas de acero inoxidable:

*As with carbon steels, there are dozens of different stainless steels, each of them presenting different properties for different applications. Some are more resistant to rust, some other are stronger, some harder... But non of them is best in all properties.*

*EGA Master has chosen 420 Stainless steel for the manufacturing its tools, as it combines optimally different properties required for manufacturing and use of stainless steel tools:*

Comme avec les aciers au carbone, il existe une douzaine de différents aciers inoxydables, qui chacun d'entre eux présente différentes propriétés pour différentes applications. Certains sont plus résistants à la corrosion, d'autres plus résistants à la traction, d'autres plus dur... Mais aucun meilleur dans un ensemble de propriétés.

EGA Master a élu l'acier inoxydable 420 pour la fabrication de ses outils, vu qu'il associe de façon optimale les différentes propriétés requise pour la fabrication et l'utilisation d'outils en acier inoxydable:

|                                                                                |                         |

En EGA Master estamos seguros de que la prevención es la cura más eficaz no sólo para aumentar la seguridad, sino también desde el punto de vista de la reducción de costes. Eliminar el riesgo de transferencia ferrosa es un factor clave para aumentar la rentabilidad a largo plazo, mientras se mantienen la seguridad en procesos y personas.

*In EGA Master we are sure that prevention is the most effective cure not only for increased safety, but also from an cost effective point of view. Eliminating the risk of ferrous transfer is a key factor for increasing profitability on the long term, while keeping processes, and people, safe.*

Chez EGA Master nous sommes sûr que la prévention est le remède le plus efficace pour augmenter la sécurité, mais aussi d'un point de vue de réduction de coût. Eliminer le risque de transfert ferreux est un facteur clef pour augmenter la rentabilité a long terme, tout en maintenant la sécurité du process et des personnes.

**PRECAUCIONES**  
**CAUTION**  
**PRÉCAUTIONS**

Estas herramientas no están clasificadas como antimagnéticas, sino que se trata de herramientas fabricadas en acero inoxidable martensítico-ferromagnético cuya permeabilidad magnética es muy superior a la unidad.

*These tools are not classified as non-magnetic but tools made of martensitic - ferromagnetic stainless steel whose magnetic permeability is much higher than the unit.*

Cet outillage n'est pas classé comme antimagnétique, il s'agit d'un outillage fait en acier inoxydable martensitique-ferromagnétique dont la perméabilité magnétique est très supérieure à l'unité.

**Filtros de protección solar para uso laboral**

- Protegen al ojo humano frente a una radiación excesiva.
- Aumentan la comodidad y la percepción visual.
- La correcta elección del filtro dependerá de:
  - El nivel de iluminación ambiental.
  - La sensibilidad individual al deslumbramiento.
- Además de una cierta absorción de la radiación visible los filtros deben asegurar:
  - La protección del ojo en las regiones espectrales ultravioletas.
  - La protección (dependiendo de cada situación) de las infrarrojas.

**Elección del protector ocular**

La selección de un protector ocular adecuado para un riesgo determinado es de vital importancia. De no llevar a cabo la apropiada, los efectos sobre el ojo del usuario pueden variar desde una simple molestia a graves lesiones o pérdida de visión.  
 "Asegúrese de que las gafas de seguridad que utiliza han sido ensayadas y son conformes al apartado 7.1.2. Requisitos ópticos de la norma EN 166. Si están ensayadas, el Certificado CE de Tipo, indicará la Calidad Óptica X, y que es conforme a la EN 166, es decir, a todos los apartados de la norma".

**EN 172**

**Sunglare filters for industrial use**

- Protect human eye from extremely bright conditions.
- Increase comfort and visual perception.
- The right filter choice will depend on:
  - The level of environment lighting.
  - The self sensibility to the blinding.
- Apart from some absorption of the brightness, the filters must ensure:
  - The eye protection in ultraviolet spectral areas.
  - The protection (depending on the situation) to the infrareds.

**Choice of the eye protector**

Selecting an appropriate eye protection for a given risk is vital. If not performed properly, the effects on the user's eye can range from a nuisance to serious injury or loss of vision.  
 "Be sure that the spectacles you handle have been tested and the meet with the point 7.1.2. Optical requirements on the Standard EN 166. If so, on the CE Type certificate, it will be shown the Optical Quality X, and that it is according to the EN 166, that means, to all the points of the Standard".

**EN 172**

**Filtres de protection solaire pour usage au travail**

- Protègent l'œil humain face à la radiation excessive.
- Amplifient le confort et la perception visuelle.
- Le choix correcte du filtre dépendra de:
  - Le niveau d'éclairage environnemental.
  - La sensibilité individuelle de l'éblouissement.
- En plus d'une certaine absorption de la radiation visible les filtres doivent assurer:
  - La protection de l'œil sur les zones spectrales ultravioletes.
  - La protection (en fonction de cha que situation) aux infrarouges.

**Choix de la protection oculaire**

Le choix d'un protecteur oculaire approprié pour un risque déterminé est primordial. Dans le cas ou le choix est incorrecte, les effets sur l'œil de l'utilisateur peuvent varier d'une simple gêne à de graves lésions ou perte de vision.  
 "Assurez-vous que les lunettes de sécurité que vous utilisez ont été testées et sont conformes à la section 7.1.2. Conditions requises de la norme EN 166. Si elles ont été testées, le Certificat CE du Type, indiquera la Qualité Optique X, et qu'il est conforme à la EN 166, c'est-à-dire, à toutes les sections de la norme".

**Elección del protector auditivo**

Según la Directiva 2003/10/CE del 06/05/2003, publicada el 15/02/2003 y aplicable a partir de 2006, los usuarios dispondrán del protector auditivo adecuado a partir del ruido constante de 80 dB. Más allá de este umbral de seguridad podrían aparecer lesiones.

**Indispensable para conocer el protector auditivo:**

- Conocer la intensidad del ruido.
- Conocer el SNR del protector auditivo.

**Cálculo para elegir el protector más idóneo:**

$$\begin{array}{r} \text{ruido: } 100 \text{ dB} \\ - \\ \text{snr: } 27 \text{ dB} \\ \hline 73 \text{ dB} * \end{array}$$

\* Protección adecuada a menos de 80 dB.

**No descender de 65 dB**  
**Riesgo de sobreprotección**

**Choice of the ear protector**

According to the Directive 2003/10/EC of the 06/05/2003, published the 15/02/2003 and applicable from 2006, the users will have the appropriate ear protector up to the constant noise of 80 dB. Beyond this security limit could appear injuries.

**Essential to know the ear protector:**

- Know the noise intensity.
- Know the SNR of the ear protector.

**Calculation to choose the most suitable protector:**

$$\begin{array}{r} \text{noise: } 100 \text{ dB} \\ - \\ \text{snr: } 27 \text{ dB} \\ \hline 73 \text{ dB} * \end{array}$$

\* Suitable protection at less than 80 dB.

**No go down from 65 dB**  
**Overprotection risk**

**Choix du protecteur auditif**

Selon la directive 2003/10/CE du 06/05/2003, publiée le 15/02/2003 et applicable à partir de 2006, les usagers disposeront du protecteur auditif adapté à partir d'un bruit constant de 80 dB. Au-delà de ce seuil de sécurité des lésions peuvent apparaître.

**Indispensable pour connaître le protecteur auditif :**

- Connaître l'intensité du bruit.
- Connaître le SNR du protecteur auditif.

**Calcul pour choisir le protecteur le mieux adapté:**

$$\begin{array}{r} \text{bruit : } 100 \text{ dB} \\ - \\ \text{snr: } 27 \text{ dB} \\ \hline 73 \text{ dB} * \end{array}$$

\* Protection adaptée à moins de 80 dB.

**Ne pas passer sous la barre de 65dB**  
**Risque de surprotection**

**Características**

- Casco de protección, con una visera corta a lo largo, destinado a trabajos de altura en el campo de la construcción, obras públicas e industria.
- Formado por un casco y un arnés.

**Casco formado por:**

- Casco moldeado bajo presión de A.B.S.
- Portalámparas integrado.
- Modelos con (Cod. 35678) o sin (Cod. 35679) ventilación.
- Resistente a bajas temperaturas, -30 °C.
- Aislamiento eléctrico para los modelos sin ventilación (EBT). Símbolo 440 V. - Cod. 35679.
- Casco eléctricamente aislante. - Cod. 35679.
- Utilizados simultáneamente con otros equipos de protección eléctricamente aislantes, previenen el paso de una corriente peligrosa a través de las personas entrando por la cabeza. Válido para modelos sin ventilación.
- Resistente a salpicaduras de metales fundidos.
- Duración de la utilización: 48 meses.
- Válido para su uso con el adaptador para auricular Cod. 35682.

**Arnés compuesto por:**

- Un arnés textil con 4 puntos de fijación.
- Un adaptador de cabeza de polietileno de baja densidad ajustable desde 53-63 cm.
- Incorpora una maneta autobloqueante en la parte posterior de la nuca y una sudadera de confort de 32 cm.

**Characteristics**

- *Safety helmet, with a short cap made for working at heights, in the buildings, public works and industry fields.*
- *Formed by a helmet and a harness.*

**Helmet formed by:**

- *Helmet molded under A.B.S pressure.*
- *Lamp socket integrated.*
- *Models with (Cod. 35678) or without (Cod. 35679) ventilation.*
- *Resistant to low temperatures, -30°C.*
- *Electrical isolation for models without ventilation(EBT). 440 V Symbol - Cod. 35679.*
- *Electrically insulating helmet - Cod. 35679*
- *Used in conjunction with other electrically insulating protective equipment prevent dangerous current from passing through persons via their head. Valid for the model without ventilation.*
- *Resistant to molten metals.*
- *Usage duration: 48 months.*
- *Valid for the use with the ear muff adaptor Cod. 35682.*

**Harness formed by:**

- *A textile harness with 4 fixing points.*
- *A low density polythene head adapter adjustable from 53-63cm.*
- *Includes a lever on the back of the neck locking and a comfort sweatshirt of 32cm.*

**Caractéristiques**

- Casque de protection, avec une visière courte autour, destinée aux travaux en hauteur, dans le domaine de la construction, travaux publics et en industrie.
- Composé d'un casque et d'un harnais.

**Casque composé de:**

- Casque moulé sous pression en ABS.
- Douille intégrée.
- Modèles avec (cod 35678) ou sans (Cod. 35679) ventilation.
- Résistants aux températures basses, de -30°
- Isolation thermique pour les modèles non ventilés (EBT). Symbole 440V - Cod. 35679.
- Casque électriquement isolant - Cod. 35679.
- Utilisés simultanément avec d'autres équipements de protection électriquement isolants, empêchant les courants dangereux de traverser les personnes par la tête. Valable pour les modèles sans ventilation.
- Résistant aux projections de métal en fusion.
- Durée d'utilisation: 48 mois.
- Valable pour être utilisé avec un adaptateur pour écouteur Cod. 35682.

**Harnais composé de:**

- Un harnais textile avec 4 points de fixation.
- Un tour tête en polyéthylène de basse densité réglable de 53-63 cm.
- Une poignée antiblocage est incorporée derrière la nuque ainsi qu'un bandeau anti-sueur de 32 cm.

PHILIPS PH

### CONSECUENCIAS DE UNA INCORRECTA UTILIZACIÓN

#### CONSEQUENCES OF IMPROPER USE

#### CONSEQUENCE D'UNE UTILISATION INCORRECTE

Herramientas inadecuadas, zonas de contacto reducidas...

*Inadequate tools, insufficient contact surface...*

Outils inadéquats, zone de contact réduite...

... Resultado:  
puntas desgastadas, aristas partidas, cabezas de tornillo deterioradas, etc.

... Results:  
worn out tips, broken edges, damaged screw heads.

... Résultat:  
pointes usées, arêtes rompues, têtes de tournevis détériorées, etc.

Utilizar las herramientas para el trabajo que han sido diseñadas para que éstas cumplan su objetivo específico, teniendo así la calidad y el resultado deseado.

*Use the tools strictly for the purpose that they were designed for. You will thus obtain the perfect desired result.*

Utiliser les outils selon l'utilisation pour laquelle ils ont été dessinés permettra qu'ils réalisent leur objectif spécifique, avec la qualité et le résultat souhaité.

## INSTRUCCIONES DE USO Y GARANTÍA DE HERRAMIENTAS ANTICHISPA

### NON-SPARKING TOOLS INSTRUCTIONS FOR USE AND WARRANTY

### INSTRUCTIONS D'UTILISATIONS ET GARANTIE DE L'OUTIL ANTIDÉFLAGRANT

- 1 Las herramientas antichispa no pueden alcanzar la dureza de las herramientas convencionales. Por esta razón en su uso se debe tener un especial cuidado, sin sobreesfuerzos ni alta temperatura.
- 2 Si en toda llave/destornillador es imperativo emplear la medida correspondiente a la tuerca o tornillo, en el caso de las antichispa lo es aún con más razón, ya que si se usara indebidamente una de distinto tamaño al preceptivo, el efecto cizalla que se causaría propiciaría su deterioro.
- 3 El uso de herramientas antichispa no debe ser la única medida preventiva en áreas en las que se ha diseñado para ello. Otros objetos, como ropa o material presencial, deben también ser adecuadas para aplicaciones antichispa.

- 1 *Non-Sparking Tools cannot reach the hardness of conventional tools. For this reason the use of Non-Sparking Tools has to be carried out with special care, avoiding overstraining, heating, etc.*
- 2 *To avoid damage being caused to both tool and fastener, it is necessary to always ensure that the correctly sized spanner/wrench/screwdriver is selected. Due to the reduced strength and wear resistance of Non-Sparking Alloys selecting the correctly sized tool becomes essential to avoid premature wear and early deterioration of the tool.*
- 3 *The use of Non-Sparking Tools must not be the only preventive measure in areas which the items are designed for. Other items, clothes or present material must also be adequate for non-sparking purposes.*

- 1 L'outillage anti-déflagrant ne peut avoir la même dureté que l'outillage traditionnel. Pour cela, il requiert une attention spéciale, en évitant la surcharge, la chaleur...
- 2 S'il est impératif dans tous tournevis/clés d'employer la dimension correspondante à l'écrou ou à la vis, il est encore plus vital dans le cas de l'anti-déflagrant, puisque s'il s'utilise de façon incorrecte la dimension obligatoire, l'effet cisaille causé favorisera sa détérioration.
- 3 L'utilisation d'outillage anti-déflagrant ne doit pas être le Seul moyen de prévention dans les environnements pour lequel il est conçu. D'autres objets, comme les vêtements et matériaux présents doivent aussi être adaptés aux applications anti-déflagrantes.

# RECOMENDACIONES DE USO

## RECOMMENDATIONS FOR USE

### RECOMMANDATIONS D'UTILISATION

Para el correcto uso de la herramienta y la seguridad del operario  
*For the correct use of the tool and the safety of the user*  
Pour un usage correct de l'outil et la sécurité de l'opérateur

#### UTILIZACIÓN CORRECTA / CORRECT USE / UTILISATION CORRECTE

La medida nominal de la herramienta de maniobra debe corresponder con la medida nominal de la pieza a maniobrar.

*The nominal size of the tool must correspond to the nominal size of the part on which the tool will be applied.*

La mesure nominale de l'outil de manoeuvre doit correspondre avec la mesure nominale de la pièce à manoeuvrer.

Informarse de las condiciones y limitaciones del uso de cada herramienta.

*Learn the uses and limitations of each tool.*

S'informer des conditions et des limites d'usage de chaque outil.

Comprobar el estado de desgaste de las herramientas y cambiar las que están deterioradas.

*Check frequently the state of the tool and replace those that are worn out or damaged.*

Vérifier l'état d'usure des outils et changer ceux qui sont détériorés.

Cuando la herramienta es de percusión, asegurarse que la superficie de percusión sea mayor que la superficie percutida.

*With striking tools make sure that the striking surface is bigger than the surface struck.*

Quand l'outil est de percussion, s'assurer que la superficie de percussion soit supérieure à la superficie percutée.

Asegurarse de emplear el destornillador que corresponde a la medida del tornillo y de que la punta de este esté correctamente colocada en la cabeza del mismo.

*Please make sure that the screwdriver you are using corresponds to the size of the screw and that the tip is correctly positioned on the head.*

S'assurer d'utiliser le tournevis qui correspond à la dimension de la vis et que la pointe de celui-ci soit correctement placée sur la tête de la vis.

Utilizar los equipos de protección individual, cuando las condiciones laborales lo requieran.

*Use safety equipment when appropriate.*

Utiliser les équipements de protection individuelle quand les conditions de travail l'exigent.

Antes de desplazar los carros porta herramientas se deben cerrar las puertas, los cajones y otras piezas corredizas.

*Before moving roller cabinets always close all trays, drawers and doors.*

Avant de déplacer les chariots porte-outils, les portes, tiroirs et autres éléments coulissants doivent être fermés.

Accionar el freno del carro porta herramienta una vez alcanzada la posición de trabajo deseada.

*Once you reach the intended location for the roller cabinets put on the break.*

Actionner le frein du chariot porte-outils une fois atteint la position de travail désirée.

### RECOMMANDATIONS D'UTILISATION

Para el correcto uso de la herramienta y la seguridad del operario  
*For the correct use of the tool and the safety of the user*  
 Pour un usage correct de l'outil et la sécurité de l'opérateur

#### UTILIZACIÓN INCORRECTA / INCORRECT USE / UTILISATION INCORRECTE

**No utilizar como palanca herramientas que no se han diseñado para tal uso, como, por ejemplo, destornilladores, cortafrios, punzones, etc.**

*Do not use for leverage tools that have not been designed for that purpose, such as screwdrivers, chisels, punches, etc.*

Ne pas utiliser comme levier des outils qui n'aient pas été dessinés pour cet usage comme par exemple des tournevis, ciseaux, pointeaux ...

**No modificar estructuralmente la herramienta.**

*Do not modify the structure of the tool.*

Ne pas modifier l'outil au niveau de la structure.

**No utilizar herramientas deterioradas.**

*Do not use worn out or damaged tools.*

Ne pas utiliser d'outils deteriorés.

**Con el objeto de aumentar la fuerza transmitida, no percutir herramientas que no se han diseñado para ese uso.**

*Do not strike tools not designed for such purpose, trying to get higher transmitted force.*

Dans l'optique d'augmenter la force transmise, ne pas percuter des outils qui n'aient pas été dessinés pour cet usage.

**No utilizar para golpear ninguna herramienta que no haya sido diseñada para tal uso.**

*Do not use for striking purposes tools that have not been designed for that.*

Ne pas utiliser pour frapper, des outils qui n'aient pas été dessinés pour cet usage.

**No utilizar alargaderas o prolongadores para aumentar el par transmitido por la herramienta en uso.**

*Do not use extensions to increase the torque of the tool in use.*

Ne pas utiliser de rallonges ou de prolongateurs pour augmenter le couple transmis par l'outil utilisé.

**En caso de carros porta herramientas, no abrir más de un cajón al mismo tiempo.**

*Do not open at once more than one drawer of the roller cabinet.*

En cas d'utilisation de chariot porte-outils, ne pas ouvrir plus d'un tiroir en même temps.

**Las herramientas antichispa no pueden alcanzar la dureza de las herramientas convencionales. Por eso hay que evitar sobrecargas y alta temperatura.**

*Non-Sparking Tools cannot reach the hardness of conventional tools. So you have to avoid overloads and high temperature.*

L'outillage anti-déflagrant ne peut pas avoir la même dureté que l'outillage traditionnel. Donc, vous devez éviter les surcharges et la haute température.

# RECOMENDACIONES DE USO PARA MARTILLOS

## RECOMMENDATIONS FOR USE OF HAMMERS

### RECOMMANDATIONS D'UTILISATION POUR LES MARTEAUX

#### MEDIDAS PREVENTIVAS - Inspección y recomendaciones de uso PRECAUTIONARY MEASURES - Inspection and recommendations for use MESURES PRÉVENTIVES - Inspection et recommandations d'utilisation

##### INSPECCIÓN / INSPECTION / INSPECTION

No utilizar un martillo con el mango deteriorado o reforzado con cuerdas o alambres.

*Do not use a hammer with a damaged handle or reinforced with ropes or wires.*

N'utilisez pas de marteau dont la poignée est endommagée ou renforcée par des cordes ou des fils.

Antes de utilizar un martillo asegurarse que el mango está perfectamente unido a la cabeza. En mango cónico, cabeza bien encastrada; en resto, resina, cuña y pasador en buen estado. En aquellos que incorporen pasador de seguridad, su función es que cuando la cabeza pierda sujeción, no salga despedida. Su función no es seguir trabajando con ella. En cuanto se note la holgura en la cabeza, se debe descartar su uso.

*Before using a hammer, make sure that the handle is perfectly attached to the head. In conical shank, well set head; in rest, resin, wedge and pin in good condition. In those that incorporate a safety pin, its function is that when the head loses its grip, it does not fly off. Your role is not to continue working with her. As soon as the slack in the head is noticed, its use should be discarded.*

Avant d'utiliser un marteau, assurez-vous que la poignée est parfaitement attachée à la tête. En tige conique, tête bien fixée; au repos, résine, cale et épingle en bon état. Dans ceux qui intègrent une goupille de sécurité, sa fonction est que lorsque la tête perd sa prise, elle ne s'envole pas. Votre rôle n'est pas de continuer à travailler avec elle. Dès que le mou dans la tête est remarqué, son utilisation doit être écartée.

Seleccionar un martillo de tamaño y dureza adecuados para cada una de las superficies a golpear.

*Select a hammer of suitable size and hardness for each of the surfaces to be struck.*

Sélectionnez un marteau de taille et de dureté appropriées pour chacune des surfaces à frapper.

No utilizar martillos con la cabeza floja, cuña suelta o resina dañada.

*Do not use hammers with a loose head, loose wedge, or damaged resin.*

N'utilisez pas de marteaux avec une tête lâche, une cale lâche ou une résine endommagée.

# RECOMENDACIONES DE USO PARA MARTILLOS

## RECOMMENDATIONS FOR USE OF HAMMERS

## RECOMMANDATIONS D'UTILISATION POUR LES MARTEAUX

Utilizar gafas de seguridad homologadas.  
*Use approved safety glasses.*  
Utilisez des lunettes de sécurité approuvées.

### RECOMENDACIONES DE USO / RECOMMENDATIONS FOR USE / RECOMMANDATIONS D'UTILISATION

**Observar que la pieza a golpear se apoya sobre una base sólida para evitar rebotes. Procurar golpear sobre la superficie de impacto con toda la cara del martillo.**

*Note that the piece to be hit rests on a solid base to avoid rebounding. Try to hit the impact surface with the entire face of the hammer.*

*Notez que la pièce à frapper repose sur une base solide pour éviter les rebonds. Essayez de frapper la surface d'impact avec toute la face du marteau.*

**Sujetar el mango por el extremo en todo su perímetro.**

*Hold the handle by the end around its entire perimeter.*

*Tenez la poignée par l'extrémité sur tout son périmètre.*

**En el caso de tener que golpear clavos, éstos se deben sujetar por la cabeza y no por el extremo.**

*In the case of having to strike nails, they must be held by the head and not by the end.*

*Dans le cas où il faut frapper des clous, ils doivent être tenus par la tête et non par la fin.*

**No golpear con el lateral de la cabeza del martillo.**

*Do not hit with the side of the hammer head.*

*Ne frappez pas avec le côté de la tête du marteau.*

**No utilizar un martillo para golpear otro, otra herramienta auxiliar, o como palanca.**

*Do not use a hammer to strike another, another auxiliary tool, or as a lever.*

*N'utilisez pas de marteau pour frapper un autre, un autre outil auxiliaire ou comme levier.*

# FORMACIÓN TRAINING FORMATION

en Herramientas Industriales y de Seguridad  
*in Premium Industrial & Safety Tools*  
dans les Outils Industriels et de Sécurité

Gracias a su especialización en las industrias más exigentes y un equipo bien formado y con amplia experiencia, EGA Master dispone de una oferta de formación en el uso seguro de herramienta.

Thanks to its specialization in the most demanding industries and a well-trained, highly experienced team, EGA Master offers various safety training seminars.

Grâce à sa spécialisation dans les industries les plus exigeantes et à une équipe bien formée et très expérimentée, EGA Master dispose d'une offre de formation sur l'utilisation sûre des outils.
